WORK EXPERIENCE

Full Stack Developer Intern

Oct 2024 - Jan 2025

Octosell AI

Bangalore, Mumbai (Remote)

- Developed and integrated chat logs and a setup guide panel (post-subscription feature) using **Shopify Polaris**, **Gadget.dev**, and **JavaScript** for the admin panel.
- Managed Shopify's **MySQL-based database with sharding** via GraphQL, utilizing **Node.js** on **Gadget.dev** to implement features and create REST API endpoints.
- Designed a settings page with editable options (**color**, **banner**, **questions**) that synchronized changes across the admin panel, preview editor, and theme editor using programmatically generated metafields.
- Revamped the **UI/UX** of Shopify pop-ups for **mobile and desktop**, ensuring responsiveness and integrating **client-specific features** such as drawer-type navigation for mobile.

SKILLS

Programming Languages: Java, JavaScript, Python, TypeScript, SQL, YAML

Technologies & Tools: MongoDB, PostgreSQL, React.js, Node.js, Express.js, Socket.io, Git, Docker, AWS, Flask, GitHub Actions, Unix/Linux, CI/CD, Redis

Areas of Interest: Software Development (SDE), Database Management, Data Structures & Algorithms, GenAI, Scalable Applications, Basic System Design

Computer Science Fundamentals: Operating Systems, DBMS, Object-Oriented Programming (OOP), Computer Networks

Other Skills: Problem-Solving, Communication, Time Management, Teamwork, Leadership, Open Source Contributions

EDUCATION

• Sardar Patel Institute of Technology, Mumbai

2022 - 2026

Bachelor's Degree in Computer Science Engineering (Artificial Intelligence and Machine Learning)

PROJECTS

Scalable Node.js Socket Chat: Redis Pub/Sub Architecture 🐙

Building a horizontally scalable real-time chat system using Redis pub/sub architecture.

- Tools & technologies used:** TypeScript, Next.js, Socket.IO, Redis/Valkey, Aiven Cloud, Pub/Sub Architecture.
- Engineered a **scalable real-time chat system** implementing a **pub/sub architecture** with **Redis/Valkey** as the message broker, enabling seamless message distribution across multiple server instances using **Aiven Cloud's Redis/Valkey service**.
- Developed a **distributed system** using **Socket.IO** for real-time bidirectional communication, with **Redis channels** handling message queuing and delivery, ensuring message persistence and fault tolerance.

SmartGen: AI-Powered Social Media to Amazon Listing Automation 🐙

Automating the conversion of Instagram product posts into optimized Amazon listings.

- Tools & technologies used:** Javascript, Next.js, Flask, MongoDB, Instagram Graph API, Amazon Seller API
- Built a **Flask-based RESTful API** integrating **Instagram Graph API** and **Amazon Seller API** to automate product listing creation and track performance in real time.
- Designed an AI pipeline to **identify product-related posts**, **remove duplicates**, and **merge multiple entries** showcasing the same product.
- Extracted key product features using **BLIP (NLP)** and **CLIP (Vision)** models for accurate categorization and auto-generated Amazon-ready descriptions.

ACHIEVEMENTS

- Open Source Contribution 🐙** : Resolved an issue of extra blank page to render during pagination when displaying data in sets of five, by refining offset and boundary condition logic.
- Google Developers Group Solutions Challenge TOP 105** : Shortlisted as one of the **TOP 105** teams from **64000** registrations and **3700+** projects
- Competitive Programming** : Achieved a rank of **161** among 30K people by scoring 500 in **Codechef Starters 179** rated.
- Smart India Hackathon finalist** : Shortlisted as one of the 50 teams for SIH for a project on Automating traffic lights using AI to reduce traffic. 2024
- JEE Mains Percentile** : 97.6%, Qualified in JEE Adv and got rank 2022
