Education

Sardar Patel Institute of Technology

Nov 2022 - June 2026

Bachelor of Technology in Computer Science and Engineering; CGPA: 8.11

Mumbai, India

Technical Skills

Languages : C++, JavaScript

Web Development : React.js, Node.js, Express.js, TailwindCSS, JWT, REST APIs

Databases : MongoDB, MySQL

DevOps/Tools: Git, GitHub, Docker, Postman

CS Fundamentals: Data Structures, Algorithms, OOP, DBMS

Projects

WikiComic — React.js, Node.js, MongoDB, Hugging Face, Django, LLaMA3, Flux1.dev

April 2025

- Architected an end-to-end **GenAI-powered learning platform** that transforms **100+ Wikipedia topics** into style-based comics, tailored to user preferences using contextual generation and image synthesis.
- Designed a multi-stage pipeline using **LLaMA3** for summarization, storytelling, and scene scripting, and **Flux1.dev** for generating comic visuals from scene descriptions.
- Engineered scalable **REST APIs** with Node.js and MongoDB, integrating a fully responsive frontend in React.
- Implemented **quiz-based gamification** with user scores to unlock new comic styles as progression incentives.

CodeCollab IDE — React.js, TailwindCSS, Node.js, Liveblocks, MongoDB

March 2025

- Developed a **real-time collaborative IDE** adopted by **20+ students** for pair/group programming, featuring Git integration, Monaco editor, and ML-powered code suggestions for enhanced productivity.
- Streamlined authentication, document versioning, and seamless communication between frontend and backend services.
- Integrated **Monaco Editor** with collaborative features and implemented PDF redaction as part of code-sharing.
- Created responsive UI using Tailwind CSS and Framer Motion with **real-time user presence indicators**.

GeoLoopAI — Python, Graphs, OpenCV

May 2025

- Detected roundabouts in shapefile-based map data by converting maps to graphs and filtering **200+ detected cycles** using compactness ratio and structural features such as size, road connectivity, and clustering.
- Further refined results using OpenCV's grayscale conversion, Gaussian blur, and Hough Transform, successfully refining geospatial data by 99.84%
- Applied **graph algorithms** to geospatial data for pattern recognition and detection of circular road structures.

Journey Nest — React, Node.js, MongoDB, JWT, Cloudinary

Oct 2024 - Dec 2024

- Developed a full-stack listing and review platform supporting **50+ dynamic listings** with user authentication, image uploads, responsive design, and interactive review functionality.
- Implemented **JWT authentication** with session management, role based access and error handling.
- Integrated Cloudinary API for scalable image storage and automatic optimization.
- Built React frontend with component architecture and **REST APIs** for data management.

Achievements

- 1st Place**, HERE Technologies India Hackathon – Geospatial AI solution
- Top 10**, Akravat Hackathon (Top 3 in GenAI) – CSI-IEEE SPIT
- Top 15 Finalist**, HackVerse – NIT Surathkal (400+ teams)
- Top 10 Finalist**, VrikshaNeeti – Great Lakes Institute of Management

May 2025

April 2025

Jan 2025

Nov 2024

Leadership & Extracurricular Activities

IPL Auction Event - Executive Head

March 2024 - May 2024

Supervised event execution with seamless team coordination.

College Cricket Team & Sports Committee

Nov 2022 - June 2023

Event Head & Player - Organized cricket events and represented the college team.
