

PRAVEEN VISHWAKARMA

Ramabai, Ghatkopar(E), Mumbai

📞 7208520038 ✉ praveenvkr21@gmail.com 🔗 [linkedin.com/in/praveen-vishwakarma25](https://www.linkedin.com/in/praveen-vishwakarma25) 🐙 github.com/PraveenVkr

Education

Bharatiya Vidya Bhavan's Sardar Patel Institute of Technology <i>Bachelor of Technology in Computer Science and Engineering (AIML)</i>	2022–Present <i>CGPA: 8.53</i>
RJ College of Arts, Science & Commerce <i>Higher Secondary Certificate (HSC), Maharashtra State Board</i>	2020–2022 <i>Percentage: 92.6%</i>
Suyash Vidyalaya <i>Secondary School Certificate (SSC), Maharashtra State Board</i>	2018–2020 <i>Percentage: 93.6%</i>

Technical Skills

Languages: Java, Solidity, C, SQL
Technologies / Frameworks: Next.js, TailwindCSS, Express, Node.js, Blockchain, REST API
Databases: MySQL, MongoDB, Redis
Developer Tools: Postman, Docker, Git, GitHub

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Computer Networks
- Blockchain
- Operating systems
- Database Management
- Machine Learning
- Generative AI

Projects

Decentralized Learning Hub | *Next.js, Solidity, Tailwind CSS, Ganache, IPFS* **April 2025**

Source Code: github.com/PraveenVkr/DLH

- Built a functional **decentralized e-learning platform** supporting both **Instructor** and **Student** roles.
- Implemented secure **Ethereum transactions** to handle purchases, certification, and enrollments.
- Used **SFTs** for enrolled courses and **SBTs** for non-transferable certificates.
- Integrated robust **smart contracts** in **Solidity**, deployed on **Ganache**, and used **IPFS (Pinata)** for decentralized storage of course content and quizzes.

PaperE | *Next.js, MySQL, Tailwind CSS, Redis, Docker* **October 2024**

Source Code: github.com/PraveenVkr/PaperE

- Designed and developed a full-stack **Next.js** web application enabling users to explore PYQs by semester and subject
- Implemented backend **MySQL** database with persistent **Docker container** storage for reliable data management.
- Implemented **Redis caching** to optimize database query performance, significantly improving response times.
- Built dynamic frontend routing for semester and subject selection, with secure links opening protected PDF resources in new tabs.

MyMovieList | *Next.js, Tailwind CSS, Redis, Docker* **July 2025**

Source Code: github.com/PraveenVkr/MyMovieList

- Built a full-stack movie discovery app using **Next.js** with search, filtering, and detailed **TMDb**-powered views.
- Implemented **real-time Letterboxd list imports** using **Server-Sent Events** for seamless progressive updates.
- Designed a **Redis caching strategy** to reduce duplicate streaming platform lookups and optimize load times.
- Built **API routes** for fetching movie metadata, managing cache, and dynamically retrieving availability of the movie from multiple sources.

Certificates

- The Complete Full-Stack Web Development Bootcamp - Dr. Angela Yu (Udemy)
- Solidity: Zero to Hero - Anni (CodiesAlert)
