Professional Summary

Curious and motivated **Computer Science student** with strong interest in **Development, Machine Learning, and Data Science**. Eager to **learn new technologies**, Interested in working on impactful projects, with hands-on project experience in healthcare, finance, and analytics, and apply problem-solving skills to build real-world solutions.

Education

Bharatiya Vidya Bhavan's Sardar Patel Institute of Technology, Mumbai

B.Tech in Computer Science and Engineering (Data Science)

Aug 2022 – May 2026 (Expected)

Sanjay Ghodawat Institute

Higher Secondary Education (12th Grade)

Jun 2020 – May 2022

Experience

LFG Cares Healthcare Pvt. Ltd. – Data Analyst Intern

May 2025 – Jun 2025

- Analyzed healthcare datasets to extract actionable insights and improve service delivery.
- Performed data cleaning, exploratory data analysis (EDA), and created Python-based analytical reports.

Relevant Coursework

- | | | |
|-----------------------|--------------------|-------------------------------|
| • Data Structures | • Data Science | • Object-Oriented Programming |
| • Database Management | • Machine Learning | • Operating Systems |
| • Computer Networks | | |

Projects

CureConnect – Online Healthcare Appointment

2025

Repository

Tech: React, Express, Node.js, MongoDB, REST APIs

- Built a full-stack doctor appointment system using MERN with secure authentication, profile management, and booking features.
- Implemented CRUD operations for searching doctors, managing appointments, and tracking history.
- Developed RESTful APIs with Node.js/Express and integrated MongoDB for seamless client-server interaction.

EV Analytics & Insights Dashboard – Power BI

2025

Tech: Power BI, DAX, Map Visuals

- Built a Power BI data model by importing EV datasets, creating calculated columns, and applying DAX measures to uncover insights.
- Designed interactive visuals including charts, KPIs, and slicers to monitor electric vehicle adoption and performance trends.
- Implemented state-wise analysis with map visuals for geospatial comparisons.

FinTrack – AI-Based Financial Insight & Recommendation System

2025

Repository

Tech: ReactJS, LSTM, XGBoost, MongoDB, Python

- Developed a system to recommend personalized investment strategies using transaction data, inflation forecasts, and sentiment analysis.
- Trained an LSTM model to predict inflation trends and applied sentiment scoring on financial news using NLP.
- Delivered insights through a ReactJS dashboard offering tailored SIP, FD, and mutual fund suggestions.

Technical Skills

Languages: Java

Libraries / Frameworks: React.js, Node.js, Express.js, Tailwind CSS, Deepseek R1

Databases: MongoDB Atlas, MySQL

APIs / Tools: REST APIs, JWT, Razorpay, Stripe, Gemini API

Other Skills: NumPy, Pandas, Scikit-learn, Matplotlib

Achievements & Activities

- Participated in HERE Technologies API-Based Project Development Initiative
- Volunteered for Tree Plantation Drive at KNP Veterinary College
