Education

Sardar Patel Institute of Technology, Mumbai

Dec 2022 - June 2026

Bachelor of Technology in CSE(DS)

CGPA : 8.63

PACE Junior Science College, Thane

May 2019 – March 2021

HSC (Class XII)

Percentage : 90.67%

Experience

DeepCytesUK

June 2024 - Dec 2024

Red Team Analyst Apprentice - Certificate

- Developed a SaaS-based web vulnerability scanner by automating and integrating industry-standard tools (Nmap, Recon-ng, Nikto, etc) to perform comprehensive security assessments, significantly reducing manual analysis time.
- Wrote Python scripts to automate scans, parse tool outputs, and generate unified reports, streamlining vulnerability identification and prioritization for clients.

Projects

GoChat | Golang, React, Redis, WebSocket

2025

- Developed a scalable real-time chat backend using **Golang**, implementing server-side logic for **user authentication**, **contact management**, and **WebSocket**-based messaging.
- Managed **concurrency** using **goroutines** and **channels** to handle multiple user sessions and real-time message delivery efficiently.
- Integrated **Redis** for real-time data operations, utilizing features like **Pub/Sub**, **SET**, and **REDISJSON** for user data management and chat message broadcasting.
- Decoupled message producers and consumers using **Redis Pub/Sub**, enabling scalable, **event-driven communication** with minimal coupling.

SentiView | Streamlit, DeBERTa, FastAPI, Ngrok, Uvicorn

2025

- Fine-tuned **DeBERTa-v3** for **aspect-based sentiment analysis**, achieving **96% accuracy** in classifying sentiments (**positive/neutral/negative**) for product aspects like battery life and price.
- Built a **FastAPI** backend with **ngrok** tunneling to serve real-time predictions, enabling scalable sentiment analysis via a **REST API**.
- Preprocessed **4000+ laptop reviews** (removing noise, encoding labels) and leveraged **PyTorch** with **mixed-precision training (FP16)** on **GPU** to accelerate model training and reduce memory usage.

Shortify | Golang, Fiber, Redis, Docker, REST API

2024

- Developed a **URL shortener** using **Golang** and the **Fiber** web framework, supporting **custom slugs**, automatic **HTTPS enforcement**, and **301 redirects**.
- Implemented **IP-based rate limiting** using **Redis**, allowing only **10 API requests per 30 minutes** per client, with quota tracking and automatic reset timers.
- Integrated **Redis** as the primary datastore to persist shortened URLs with **configurable expiry**, and tracked redirect counts via **atomic operations** using Redis counters.
- Containerized the service with **Docker**, and modularized the application by separating **API logic** and **middleware**.

Technical Skills

Languages: Java, Go, Python, SQL

Databases: MySQL, Redis

Web & Tools: Docker, FastAPI

Relevant Course work: Data Structures and Algorithms, Object Oriented Programming, DBMS, Distributed Computing

Extracurricular

Kala Ghoda Arts Festival

February 2024

Volunteer

- Assisted with on-ground coordination for 200+ attendees and 30+ artists at one of India's largest cultural festivals

Institution's Innovation Council

Dec 2023 - March 2024

Member

- Oversaw functioning of 10+ committees comprising 200+ members, ensuring event execution aligned with college policies and standards.
