Education

Bharatiya Vidya Bhavan's Sardar Patel Institute of Technology, Mumbai

Nov 2022 - 2026

BTech.in Computer Science and Engineering (Data Science)

CGPA - 8.8 (As of Semester 4)

SP Jain Institute of Management and Research, Mumbai

Feb 2024 - 2025

Minor in Management

Skills

Languages: Python, C++, JavaScript

Core CS: DSA, DBMS, OS, Computer Networks, Distributed Computing

Backend: Django, Django REST Framework, JWT, PostgreSQL, MySQL

Frontend: React.js, HTML/CSS

Data Science/ML: Numpy, Pandas, Matplotlib, Seaborn, scikit-learn, TensorFlow, Keras, PyTorch

DevOps & Cloud: Docker, Redis, AWS EC2, S3, Firebase

Projects

ShikshaSangam

Dec 2024

Student-Alumni Connection Platform for Institutions | SIH 2024 Final Round Project

<https://github.com/ShubhamKarampure/ShikshaSangam>

- Collaborated on developing ShikshaSangam, a cross-platform application connecting students, alumni, and institutions through features like real-time chat, event hosting, job portals, and AI-powered recommendations.
- Played a key role in backend development using Django REST framework creating and testing REST endpoints for seamless user interaction and data management and secure authentication.
- Implemented AI-powered recommendations using a custom model and FAISS vector database, matching students with relevant alumni based on interests and resumes.
- Built a CSV upload feature to streamline on-boarding, enabling colleges to generate user accounts and send credentials via email.

Serenity

March 2025

An AI driven Mental Health Platform | Winning Project for Code On Hackathon by IET-IEM

<https://github.com/unicorn004/Serenity>

- Built an AI-powered mental health platform featuring a context-aware RAG chatbot that personalizes interactions using data from user profiles, assessments, and journal entries.
- Developed an LLM-based grading system for dynamic assessment scoring, generating personalized remarks and recommendations
- The platform also includes habit tracking, gamification, emotion detection, community forums, therapist booking, and an emergency SOS system.

Scalable Real-Time Chat App

April 2025

Full-stack Chat System with Asynchronous Messaging and Production Deployment

<https://github.com/ArooshJ/ChatApp>

- Built a real-time chat platform using Django Channels and WebSockets with Redis pub/sub layer.
- Integrated asynchronous tasks using Celery for notifications and background processing.
- Containerized the entire stack with Docker Compose; load-balanced using NGINX across replicated backend services.

Experience

AIM4U Software Solutions Pvt Ltd

Jan 2025 – May 2025

ML and Backend Development Intern

- Deployed a skin disease classification ML model within a Django backend, integrating S3-based image uploads and model predictions for remote doctor diagnosis; handled end-to-end deployment on AWS EC2.
- Debugged and upgraded legacy systems, including modernizing a deprecated push notification system using Firebase SDK and improving reliability of existing endpoints in an undocumented, unstructured codebase.

IEEE CS SPIT

Sep 2023 – Jul 2024

Deputy Tech Head

- Co-Led the Technical aspect of all the major and minor events of the committee, including a National Level AI Hackathon Aeravat, and monthly coding contests, online and offline.
