EDUCATION

B.TECH, CSE with specialization in Data Science

Nov 2022 - May 2026

9.28 GPA

Bhartiya Vidya Bhavan's Sardar Patel Institute of Technology

TECHNICAL SKILLS AND KNOWLEDGE

Computer Fundamentals: Data Structures and Algorithms, Object Oriented Programming, Computer Communication and Networks, Database Management and queries

Languages: C/C++, Java, Python, Javascript, SQL

Technologies: Node, Express, Django, React, React Native, MySQL, MongoDB

Tools & others: git, github, docker, postman

PROJECTS

AlumniVerse – Web Platform for Alumni-Student Engagement [GitHub](#)

Apr 2025

Next.js, TypeScript, Tailwind CSS, Node.js, Express, MongoDB, Socket.IO, Cloudinary, LangChain, Groq

- A scalable full-stack platform for alumni-student networking with secure authentication and profile management.
- Integrated real-time messaging (Socket.IO), media uploads (Cloudinary), a searchable alumni directory with 6+ filters and automated content moderation using LangChain.
- Developed a context-aware chatbot tool using LangChain, helping users save time during alumni introductions and reducing duplicate questions.
- Designed 10+ responsive React components with Tailwind, focused on clean UI & User Flow.
- Deployed frontend on Vercel and backend APIs on Render with CI/CD for fast and reliable delivery.

Serenity - AI driven Mental Health Platform [GitHub](#)

Mar 2025

React, Django, PostgreSQL, Tailwind CSS, python, Langchain, RAG

- Personalized mental health assessments powered by AI, adapting questions in real-time based on user responses. Includes emotion detection through diary entries and image analysis to provide deeper insight into user well-being.
- Integrated RAG-based chatbot that delivers context-aware guidance, wellness tips, and real-time support. A diary module helps users track emotions, reflect on experiences, and contribute to their mental health insights.
- Built with a modular Django backend and secure JWT-authenticated APIs, enabling smooth integration across features like assessments, user data, support groups, etc. Prepared for scalability and data security.

SignLingo - ASL learning and practicing website [GitHub](#)

Apr 2024

Python, OpenCV, Sklearn, mediapipe, streamlit

- Made web user interface using streamlit for learning and practicing 26 ASL alphabets using OpenCV for Image processing and Mediapipe for 21 hand landmark points extraction.
- Created an ASL alphabet recognition Machine learning model using OpenCV for dataset generation and Random Forest Classifier (scikit-learn), achieving >95% accuracy.

ACHIEVEMENTS

- > Finalist at **Smart India Hackathon 2024** for Problem Statement no 1633 (Top 5 out of 500+ teams)
- > Winner at **Code On Hackathon** by IET-IEM Kolkata among 50+ teams.
- > Runner Up at **Web Dash Hackathon** by IEEE JMI among 60+ teams.
- > Runner up in both **CodeHousie & Code It Out** with 150+ participants
- > Finalist among 1500+ registered candidates in **Code-Uncode** competition
- > **Pupil** at Codeforces max Rated 1246, Solved over 400+ DSA problems accross all Coding platforms
