## Profile

---

Final-year Data Science student skilled in Python, SQL [🔗](#), and Power BI. Worked on ML projects, dashboards, and basic data pipelines. Interested in AI, data governance, and solving real-world problems with data.

## Education

---

**BTech - Computer Science and Engineering (Data Science)**

*Bharatiya Vidya Bhavan's Sardar Patel Institute of Technology, Mumbai, India*

**2022 – 2026**

*7.3/10 CGPA*

## Projects

---

### Talk2Data – Natural Language to SQL Query Generator [\[Git\]](#) [🔗](#)

- Developed a Streamlit web app that converts natural language into SQL queries using the **Groq API** and runs them on an **SQLite** employee database for real-time insights that automate reporting and enhance governance capabilities.
- Enabled non-technical users (e.g., HR teams) to automate salary analysis and headcount reporting, reducing manual effort by over 70%.

### AI-Based Pest and Disease Diagnosis Assistant [\[Git\]](#) [🔗](#)

- Built a CNN-based image classifier using **TensorFlow/Keras** and **NumPy** to detect diseases in tomato, sugarcane, and potato crops from 30,000+ labeled images.
- Achieved 92% validation accuracy with data augmentation, early stopping, and confusion matrix analysis; visualized model performance using **Matplotlib**.
- Prototyping a multi-modal AI tool that accepts image, voice, and text inputs to support responsible AI and real-time diagnostics.

### Hotel Booking Cancellation Analysis [\[Git\]](#) [🔗](#)

- Analyzed 119K+ hotel booking records and built a **Random Forest model** (82% accuracy) to predict cancellations, identifying key features like lead time, deposit type, and customer type.
- Designed a **Power BI dashboard** to visualize cancellation patterns by month, market segment, guest country, and stay type, enabling data-driven strategies for reducing peak-season cancellations and improving booking stability.

### E-commerce Sales Analytics Dashboard [\[Tableau\]](#) [🔗](#)

- Created an interactive Tableau dashboard to analyze \$14M+ in YTD sales, profit, and order volume across customer segments and global markets (LATAM, Europe, Pacific Asia).
- Identified underperforming product categories and declining order trends, enabling data-driven decisions in pricing, inventory planning, and targeted marketing.

## Technologies

---

- **Programming:** Python, SQL, Java, C
- **Data & ML Tools:** Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, TensorFlow/Keras
- **Visualization:** Power BI, Tableau, Streamlit
- **Tools & Platforms:** Git, Jupyter Notebook, Google Colab, MS Excel

## Leadership

---

### Funzone Creative Head – Oculus Committee, SPIT Tech Festival

*Jan - March 2024*

- Designed and coordinated 12+ promotional visuals for the Funzone event, collaborating with the design and event teams. Contributed to increased engagement and participation through creative branding.

## Courses Certifications

---

### Tata GenAI Data Analytics Virtual Internship (Forage) [🔗](#)

Applied GenAI for exploratory data analysis and designed AI-driven strategies for financial services.

### Deloitte Australia Data Analytics Virtual Internship (Forage) [🔗](#)

Performed classification and built Tableau dashboards for forensic data analysis.

- **Innovation, Business Models, and Entrepreneurship (NPTEL):** Explored lean startup principles, innovation frameworks, and business model design.
