

SIDDHI SHARAD KUMBHAR

📞 7066343531 kumbharsiddhi30@gmail.com [in LinkedIn](#) [GitHub](#) [LeetCode](#)

Education

Sardar Patel Institute Of Technology

B-Tech in Computer Science and Engineering(Data Science) CGPA: 8.2/10

Nov 2022 – June 2026

Mumbai, Maharashtra

Experience

AiLusion | GenAI Intern | Remote

Nov 2024 – Feb 2025

- Designed and implemented end-to-end **AI image generation workflows** for fashion models, enabling gender-specific and pose-consistent outputs; boosted visual realism by ~35% as measured by internal QA benchmarks.
- Automated **clothing extraction, accessory placement, and background integration** to enhance realism and scalability of virtual outfit visualization.
- Developed **body part detection and region-specific editing** workflows for precise image manipulation and consistent character enhancement in virtual fitting experiences.

Projects

Women's Safety Application | GitHub | *Django, MapBox API, Twilio API, Vosk Model*

Jan 2025

- Engineered a **real-time safety web app (Suraksha-Sathi)** with route tracking, deviation alerts, and emergency location sharing for increased personal security.
- Deployed **voice recognition with the Vosk model** to detect predefined distress keywords (e.g., "HELP") and automatically trigger SOS alerts with location data.
- Enabled **risk-level alerts and community-based zone flagging**, allowing users to collaboratively mark and visualize unsafe/safe areas in real time.

ML-Powered Cyclist Safety Assistant | GitHub | *Django, OpenCV, TensorFlow, Computer Vision*

Feb 2025

- Developed an **AI-driven safety assistant** that detects rear-approaching vehicles and provides real-time proximity alerts to prevent cyclist collisions.
- Implemented **facial fatigue monitoring** to identify signs of drowsiness in cyclists and suggest rest breaks for safer riding.
- Architected a **terrain insight system** using crowdsourced route data to optimize cycling paths based on elevation, traffic, and surface conditions.

Aculearn (Personalized Learning Platform) | GitHub | *Django, Dlib, Gemini API, BERT, React.js*

May 2025

- Designed a personalized **adaptive learning platform** delivering 100+ custom MCQs; dynamically adjusted question difficulty based on learner performance, improving engagement by ~30%.
- Incorporated **emotion-based engagement tracking** via webcam to detect drowsiness and trigger break prompts or content variation.
- Leveraged Hugging Face Transformers and Facebook BERT to enable **automatic summarization of lecture notes**, reducing reading time by ~40%.

Achievements

- Achieved a **1700+** rating on LeetCode and solved over **800+** problems across LeetCode and GeeksforGeeks (GFG).
- Secured **3rd position** in **HERE Technologies India Hackathon 2025**.
- Secured **2nd position** in the **International Women Hackathon** organized by RAIT-W.
- Secured **3rd position** in **SPIT Hackathon** organized by CSI-SPIT, out of 600+ teams.
- Secured **2nd position** in **VIT Codeathon** organized by VIT.

Technical Skills

Languages: Java, Python, SQL

ML/AI: Numpy, Pandas, Matplotlib, Scikit Learn, OpenCV

Technologies/Frameworks: Django, CNN, Stable Diffusion, Streamlit, React.js

Leadership

- Head of PR, Sports Committee, SPIT:** Spearheaded end-to-end PR strategy, large-scale events such as the SPIT Marathon and SPoorthi; drove record campus engagement and attracted 600+ participants to the marathon.
