Education

Sardar Patel Institute of Technology

Bachelor of Technology in Computer Science (Specialization: Data Science)

2022 – 2026

Mumbai, Maharashtra

Relevant Coursework

- | | | | |
|-----------------------|-----------------------|-------------------------|-------------------|
| • Data Structures | • Computer Networks | • Computer Architecture | • Data Science |
| • Algorithms Analysis | • Database Management | • Internet Technology | • Object-Oriented |
| • Operating Systems | • Cloud Computing | • Machine Learning | Programming |

Experience

AI: Transformative Learning with TechSaksham Certificate

Dec 2024 – Jan 2025

Joint CSR initiative by Microsoft & SAP / Implemented by Edunet Foundation

- Completed an intensive training and project-based internship focused on Artificial Intelligence and its transformative applications.
- Gained practical exposure to AI tools and technologies under the mentorship of industry leaders from Microsoft and SAP.
- Worked on real-world problem-solving and innovation in AI through structured modules and expert-led sessions.

Projects

CoDev AI – Real-Time Collaborative Coding Assistant [GitHub](#)

Apr. 2025 – Jun. 2025

- Built a full-stack AI-powered platform that enables real-time collaboration and AI-assisted code generation using Jamna AI API, with in-browser execution via Web Containers.
- Implemented secure user authentication with JWT, bcrypt, and Redis token blacklisting to ensure safe session handling and route protection.
- Developed real-time chat functionality using Socket.io, supporting project-specific rooms and AI-generated responses triggered by prompts.
- Designed an interactive and responsive frontend using React, TailwindCSS, and Context API, including dynamic dashboards and project management tools.

AI Finance Platform [GitHub](#)

Oct. 2024 – Dec. 2024

- Developed a dynamic finance platform using Next.js, Supabase, Prisma, and TailwindCSS, featuring multi-account management, AI-based receipt scanning (via Gemini API), and automated monthly reports.
- Integrated background jobs using Inngest, implemented secure rate-limiting with ArcJet, and built real-time dashboards with Shadcn UI.
- Demonstrated expertise in full-stack development, AI integration, and scalable architecture.

AI Travel Planner Web App [GitHub](#)

Aug. 2024 – Nov. 2024

- Built a full-stack AI travel planning platform that generates personalized itineraries based on user inputs (destination, budget, duration).
- Integrated real-time location suggestions and dynamic routing for trip-specific views.
- Enabled Google OAuth authentication and persistent trip storage.
- Styled with responsive, modern UI components.
- Emphasized best practices in API integration, secure auth, structured data flow, and scalable deployment.

Technical Skills

Languages: Java, Python, C, HTML/CSS, JavaScript, SQL

Technologies/Frameworks: React, Node.js, Express.js, AI/ML

Developer/Software Tools: VS Code, Git & GitHub, AWS, Linux, Figma, MySQL, MongoDB

Achievements and Certifications

- Solved 400+ problems on LeetCode: [LeetCode Profile](#).
- Introduction to Generative AI: [Certificate](#).
