Education

B.Tech in Computer Science (Data Science) Sardar Patel Institute of Technology, Mumbai 11/2022 – 05/2026

- CGPA: 7.5 | CET: 98.83%ile | JEE: 90.94%ile
- **Computer Science Fundamentals:** Data Structures & Algorithms, Operating Systems, DBMS, Object-Oriented Programming, Computer Networks, Distributed Systems, Machine Learning

Skills

- **Programming Languages:** Java, C, C++17, Python, JavaScript
- **Web Frameworks:** Node.js, Express.js, React.js
- **Databases:** MySQL, MongoDB
- **Tools & Platforms:** Git, Postman

Experience

Full Stack Intern <i>Triblet</i>	01/2025 – 04/2025	Problem Statement Reviewer <i>LeetCode</i>	05/2024 – 08/2024
• Built secure authentication system using Next.js 14, NextAuth v5, and MongoDB • Integrated OAuth2 (Google, GitHub), email verification, and forgot password flow • Created Tournament Dashboard with team creation, protected routes, and role-based access		• Reviewed problem statements, improving question clarity • Developed comprehensive test cases covering edge scenarios	

Projects

Finora – AI-Powered Financial SaaS Platform 06/2025 – Present

MERN Stack, TypeScript, Google GenAI, MongoDB, Resend

- Built a full-stack finance management application with **AI-powered receipt scanning** and **monthly report generation** using **Google Gemini APIs**.
- Integrated secure authentication, **CRUD operations** for transactions, **CSV import**, and **recurring payments** using **cron jobs**.
- Automated email reports and monthly summaries using **Resend API** for enhanced user engagement.
- Designed interactive dashboards with data filtering, visual charts, and **AI-generated financial insights** to support informed decision-making.

CollabBoard 10/2024 – 12/2024

Node.js, WebSocket, Redis, Socket.IO, MongoDB

- Collaborated the backend for a real-time collaborative whiteboard using **Node.js** and **Socket.IO**, enabling multiple users to draw and edit simultaneously on a shared canvas.
- Implemented persistent session management and real-time communication using **WebSocket** protocols.
- Used **Redis Pub/Sub** architecture to sync drawing data across distributed instances for high scalability.
- Managed user connections, authentication, and whiteboard session lifecycles through efficient RESTful endpoints.
- Employed **MongoDB** to store user data, session metadata, and board histories for retrieval and replay.
- Ensured minimal latency and high throughput through proper load balancing and socket lifecycle management.

Edupulse 05/2024 – 06/2024

Node.js, Express.js, React.js, MongoDB, EJS

- Engineered a modular web application to streamline school operations including student registration, attendance, performance tracking, and teacher management.
- Developed secure backend services using **Node.js** and **Express**, incorporating **JWT/session-based authentication** and scalable RESTful APIs.
- Utilized **MongoDB with Mongoose** for designing optimized schemas and improving query performance through indexing.
- Employed **low-level debugging techniques** such as request tracing, middleware logging, and query diagnostics to resolve backend performance bottlenecks.
- Defined **role-based access control (RBAC)** and data permission layers for 3 users: Admin, Teacher, and Student.
- Followed industry best practices in software development, version control

Achievements

• LeetCode Guardian (Top 1% globally 390+ days streak)	Rating: 2162
• Codeforces Expert (Top 1.7%)	Rating: 1672
• CodeSpree	All-India Rank 11
• CodeHousie '23 and Acm Semicode '24 Winner	3rd place / 200+ Teams
• IIT Madras CP Potpourri & Crackathon Finalist	
• 5+ National Competitive Programming Finals	
• Published 1 LeetCode Problem in Contest and received a T-shirt	02/2025
