WORK EXPERIENCE

Frontend web developer at Montran Corporation

15 June - 23 December 2024

- Built responsive UIs in Angular for projects like an image gallery and student portal.
- Applied component-based design and integrated APIs.
- Created a working remittance portal frontend for YES Bank as a final project.

UI/UX Designer

25 March - 8 May 2025

- Studied how to build a proper UI experience that users would find comforting and approachable
- Designed a logo and wireframe for client, admin and manager personas of a company called 'AuditVeda'
- Got firsthand experience of working in a startup with immense enthusiasm and tremendous ideas

PROJECTS AND ACHIEVEMENTS

AlgoGraph Website

Feb 2024

- Designed Allograph, an educational platform to simplify DSA learning for students.
- Built using Next.js and integrated Three.js for interactive visualizations.
- Introduced a 5-step DSA learning model: understanding, visualizing, simple sums, complex problems, and revision quizzes.
- Won second place at the Frontend Odyssey Hackathon for innovative design and impact.
