Summary

Final-year B.Tech Computer Science (Data Science) student with a strong foundation in programming, data analysis, and financial modeling. Experienced in building data-driven applications and conducting market research, risk analysis, and business case evaluations. Passionate about combining technology with finance, with hands-on exposure to startup deal-making and operational decision-making. Actively seeking roles in Investment Banking and Corporate Risk where data-driven insights, strategic thinking, and cross-functional collaboration are key.

Education

Sardar Patel Institute of Technology

Nov 2022 – June 2026

B.Tech in Computer Science and Engineering (Data Science)

- GPA: 7.80/10
- **Coursework:** Data Structures and Algorithms, Database Management Systems, Data Analysis, Python for Business Analysis, Probability and Statistics, Machine Learning

St. Lawrence Junior College

Higher Secondary Certificate (12th Grade)

- Score: 97.33%
- **Coursework:** Physics, Chemistry, Mathematics, English

St. Lawrence High School

Secondary School Certificate (10th Grade)

- Score: 93.80%

Experience

Software Development Intern

June 2024 – August 2024

Smowcode

- Developed Menu Maker tool that automated creation of 50+ client-specific digital menus, reducing manual effort
- Worked on creating libraries for the Smowcode platform

Founding Member

Mumbai, India

Triblet (Sports Booking & Community Startup)

Dec 2024 – Present

- Structured financing roadmap
- Onboarded 6+ turf venues across Mumbai and negotiated revenue-sharing models, boosting service supply
- Built a local sports community of 700+ users within 3 months via campus activations, WhatsApp groups, and early-bird campaigns

Committee Member – Marketing

Mumbai, India

Oculus (Annual Fest)

Jan 2023 – Apr 2023

- Closed 3+ sponsorship deals, leading brand negotiations and partner onboarding
- Ran digital campaigns across 20+ colleges; boosted event reach to over 8,000 students via Instagram, email, and offline drives
- Executed a 3-day fest with 500+ attendees and 25+ events, coordinating with vendors, college staff, and external stakeholders

Projects and Case Studies

Stock Market Dashboard using Python & Streamlit

- Built an interactive web app to track and visualize live market data (NSE/BSE), including moving averages, RSI, and volume trends

- Used `yfinance`, `pandas`, and `matplotlib` for data analysis and Streamlit for rapid deployment
- Added portfolio tracking and calculated metrics like Sharpe Ratio, daily volatility, and sector allocation

Valuation Model for Indian Startups

- Built a DCF and comparable company analysis model in Excel to value early-stage Indian startups in fintech and edtech
- Collected data from Tracxn, Crunchbase, and Tofler; applied EV/EBITDA, EV/Revenue multiples for benchmarking
- Analyzed funding trends, burn rate, CAC:LTV ratios to estimate valuation bands

Case Study 1: Strategic Acquisition in the Indian EV Market

- Proposed acquisition of an emerging EV startup by a listed OEM; performed target screening, synergy estimation, and deal structuring
- Modeled accretion/dilution impact, scenario analysis, and created a 5-slide investor presentation to support the pitch

Case Study 2: Customer Behavior Analysis at Shoppers Stop

*Business Research –
Retail Sector*

- Analyzed 90+ customer data points records to identify purchase frequency, basket size, and seasonal behavior
- Segmented customer base and provided recommendations for personalized campaigns and loyalty strategy

Skills

Languages & Tools: Python, C, C++, Java, SQL, HTML/CSS, JavaScript, React, Node.js, Git,

Finance & Analysis: Excel, Power BI, Pandas, Matplotlib, Financial Modeling (DCF, Comps, NPV/IRR)

Competitive Programming: Active participant in coding competitions on platforms such as LeetCode, Codeforces with pupil(max. 1249) on codeforces and max. 1785 on leetcode.
