Work Experience

Tata Consultancy Services (TCS)

Dec 2024 – March 2025

Internship — [Project Link](#)

Mumbai, India

- **Tech Stack:** Python, Flask, Google Cloud Functions, Cloud Storage, BigQuery, Vertex AI, Google DLP API,
- Developed **serverless GCP pipeline** for **PDF splitting**, **PII detection** via DLP API, and **secure storage** of masked documents.
- Built **RAG system** combining **Vertex AI embeddings** for **semantic search** with **Gemini LLM** for intelligent Q&A over documents.
- Implemented **pseudonymization** with **reversible PII mappings** in **BigQuery** to support data traceability.
- Processed **10+ real-world PDFs** demonstrating **scalable solution** for document privacy and compliance.
- Generated **256-dimensional page embeddings** using **Vertex AI** to enable **semantic search** and document understanding.
- Deployed **Flask-based API endpoints** to integrate pipeline with internal tools.

Projects

AI-Powered Content Creation Platform | *MERN, WebSockets, Quill, Google Gemini API*

[GitHub](#)

- Engineered **collaborative text editor** with **live editing** using **WebSockets** and **Quill**, featuring **rich text formatting** and **image insertion**.
- Implemented **auto-save functionality** at **30-second intervals** with **version control** and **rollback options**.
- Enabled document sharing through email-based links and PDF export functionality.
- Integrated **AI sidebar** for suggestions, creative formatting, poetic analysis, text-to-image, and speech-to-text.

AI Mock Interview | *React.js, Tailwind, Sentence-BERT, Flask, Gemini API*

[GitHub](#)

- Built a platform that simulates **AI-led mock interviews** based on resumes and job descriptions.
- Designed a scoring engine using **Sentence-BERT** to evaluate resume-job fit via semantic similarity and skill matching.
- Extracted resume content using PyPDF2 with section-based analysis and experience estimation.
- Used **Gemini API** to generate dynamic interview questions and personalized feedback.

EVENTVISTA | *MERN, Vercel*

[GitHub](#)

- Built an **event discovery platform** with **filtering**, **event map**, and **profile management**.
- Implemented **dynamic event posting**, **rating system**, and profile editing.
- Secured the platform with **JWT-based authentication** for login and authorization.

Education

Bharatiya Vidya Bhavan's Sardar Patel Institute of Technology (SPIT)

2022 – 2026

Bachelor of Science in Computer Science and Engineering (Data Science)

Mumbai, India

Nirmala Memorial Foundation College of Commerce and Science

2020 – 2022

Higher Secondary School Certificate (HSC) - 82.33%

Mumbai, India

Ryan International School

2020

Higher Secondary School Certificate (HSC) – 90.8%

Mumbai, India

Technical Skills

Languages: C++, Java, SQL

Developer Tools & Frameworks: React.js, Node.js, Express.js, MongoDB, TailwindCSS,

Cloud & Containerization: GCP

Extracurricular

Competitions

- **Nexus Bits Sindri Hackathon:** Selected among the **top 5 teams** out of **300+ registrations**. Built a **university website** to simplify access to academic resources, campus updates, and student services..
- **Odyssey S.P.I.T. Hackathon:** Won in a track among 300+ participants for building Sports Pro, a sports platform with turf booking, equipment purchases, and latest sports news.

Position of Responsibility

- **Executive Head, Funzone(Oculus):** Led a **30-member team** to manage a major event during the college fest, ensuring smooth operations and **300+ student participation**.
- **Committee Member, C.S.I. SPIT:** Helped organize **hackathons**, managing logistics and participant support.
- **Committee Member, Oculus:** Supported on-day operations and coordination during the **cultural fest**.
