## Education

### Sardar Patel Institute of Technology

*Bachelor of Technology in Computer Science*

Nov. 2022 – Present

Mumbai

### SP Jain Institute of Management and Research

*Minor in management and finance*

Dec. 2023 – Present

Mumbai

## Relevant Coursework

- Data Structures
- Algorithms Analysis
- Database Management
- Operating System
- Internet Technology
- Computer Networks
- Distributed Computing
- Cloud Computing

## Experience

### AIM4U Software Solutions

*Software Engineer Intern*

February 2025 – Present

Mumbai

- Utilized Firebase Admin SDK in Node.js for authentication, user management, and token verification.
- Designed and developed scalable REST APIs with efficient database interactions in Firestore.
- Designed a rolling mean algorithm reducing storage requirements to 19 % of incoming data while ensuring smooth trend adaptation and minimal error.

## Projects

### Team-Vista | *React.js, Node.js, Socket.io, Redis, MongoDB, AWS S3*

December 2024 - Present

- Developed a collaborative platform for project management, enabling users to assign tasks, set deadlines, and manage team collaboration effectively.
- Developed an in-browser coding workspace, enabling users to create and manage Node.js and Python projects, edit files, and execute code in a terminal powered by node-pty.
- Integrated Amazon S3 for secure file storage and retrieval, supporting resource uploads for projects and ensuring efficient scalability.
- Utilized Redis for real-time chat functionality, enhancing the app's scalability and performance during high user activity.

### FlowSync | *Next.js, Node.js, Express.js, PostgreSQL (Prisma ORM), Apache Kafka, OAuth 2.0*

February 2025

- Designed FlowSync as a workflow automation platform to connect applications and eliminate repetitive tasks efficiently.
- Built a scalable microservices architecture with modular backend services (primary-backend, processor, webhooks, worker).
- Implemented Apache Kafka for event-driven processing, enabling seamless service communication and real-time data handling.
- Developed robust RESTful APIs using TypeScript, ensuring optimized performance, error handling, and security.

### Prescripto | *React.js, Node.js, MongoDB, Socket.io, WebRTC*

November 2024

- Implemented secure authentication using JWT to safeguard user data and access.
- Developed separate dashboards for admins and doctors, ensuring role-specific functionality and an intuitive interface.
- Integrated Razorpay for smooth and secure payment processing during appointment bookings.
- Enabled efficient appointment management with real-time video calling capabilities powered by WebRTC.

## Technical Skills

**Languages:** Java, Python, C, JavaScript, SQL

**Developer Tools:** VS Code, Postman, GitHub

**Technologies/Frameworks:** React.js, Node.js, Express.js, MongoDB, MySQL, PostgreSQL, Django, Docker

## Achievements

- Achieved a **1471 rating**, earning the **Specialist** title on **Codeforces**, demonstrating proficiency in problem-solving
- **Solved 600+ Problems** on platforms like **LeetCode** and **Codeforces**
- **Achieved a Global Rank 124** out of 36,000 participants in **Codeforces Round 1029 (Div 3)** June 2025
- Participated in **SPIT SE Hackathon**, **CP Ignition Hackathon**, and was a **Finalist in UBS Hackathon** held at UBS campus April 2025
- **Secured Rank 4 in Code Uncode SPIT Regionals**, a competitive programming contest held across Mumbai February 2025
