PROJECTS

- CuraSphere** 🗑 | ReactJS, Spring Boot, PostgreSQL, JWT, REST, Tailwind **2025**
- Designed and implemented a modular healthcare system with independent microservices for user authentication, patient management, doctor profiling, and appointment scheduling using Spring Boot and RESTful APIs.
 - Developed secure user authentication and role-based access control with JWT, including registration and login for admins, patients, doctors, and evaluators.
 - Utilized PostgreSQL for persistence, JPA/Hibernate for ORM, and integrated microservices communication using REST APIs with centralized exception handling and DTO mapping.
 - Designed a responsive and modern frontend using React.js and Tailwind CSS for seamless UI/UX, enabling users to register, view schedules, and manage healthcare data efficiently.
- LearniFy** 🗑 | ReactJS, MongoDB, LLaMA 3.1, ExpressJS, JWT, NodeJS, Cloudinary, Flask **2024**
- Developed an interactive learning platform enhanced by AI and gamification. Used Google Gemini to create an AI chatbot to help in studies and doubt solving for students.
 - Integrated AI (LLaMA 3.1) to automate quiz and assignment grading, and generate quizzes, roadmaps, and assignments, reducing manual workload for teachers.
 - Implemented course enrollment, quiz participation with real-time leaderboard, and assignment submission features for students, fostering engaging learning experiences.
- AgriBoost** 🗑 | ReactJS, MongoDB, Bootstrap, NodeJS, ExpressJS, JWT, Cloudinary **2024**
- Developed a dynamic e-commerce website for selling and showcasing farm fresh products with tailored farmer and admin dashboards.
 - Integrated Cloudinary API for product image uploads and used the bcrypt package for secure storage of user credentials like user password. Utilized Axios package for seamless frontend-backend communication, enabling real-time product updates and reviews.
 - Designed a responsive and visually appealing interface with Bootstrap and React Icons, and managed data using MongoDB and ExpressJS.
