Education

Sardar Patel Institute of Technology, Mumbai

2022 - Present

B.Tech in Computer Science and Engineering (Data Science)

CGPA: 8.03

Annasaheb Vartak College, Mumbai

2022

Higher Secondary School Certificate

82.17%

Work Experience

Tata Consultancy Services (TCS)

Dec 2024 – March 2025

AI Intern

Hybrid

- Built Document Copilot, an AI-powered assistant that allows users to query and explore large documents with high accuracy using Vertex AI.
- Designed an end-to-end automated pipeline using Google Cloud Workflows and Functions for seamless document intake, splitting, and processing.
- Applied pseudonymization techniques using Google Cloud DLP API to detect and mask sensitive PII (e.g., names, emails) before further processing.
- Generated text embeddings with Vertex AI and stored them in BigQuery for fast, intelligent semantic search and retrieval using vector similarity.

Projects

CreatorSync | *React.js, Node.js, WebSockets, Quill, Gemini API, MongoDB* | [GitHub](#)

- Developed a real-time collaborative writing platform allowing multiple users to edit blog content simultaneously.
- Implemented version control with edit history, allowing users to track changes and restore previous content states easily.
- Integrated an AI-powered writing assistant using Gemini API to provide contextual suggestions and adaptive tone styling (e.g., professional, poetic).
- Enabled speech-to-text functionality for hands-free content creation and AI-based image generation from user-provided prompts.

Eshop | *React, Node.js, RabbitMQ, Docker Compose, HAProxy, MongoDB* | [GitHub](#)

- Created an e-commerce web app with React frontend and backend load-balanced using HAProxy.
- Used RabbitMQ to send logs to a separate logging service with its own database.
- Developed an interactive analytics dashboard for business managers to track user behavior, orders, and sales trends in real-time.
- Containerized all services using Docker Compose for easy deployment and setup.

Yorokobi | *Node.js, MongoDB, Express, React.js, JavaScript* | [GitHub](#)

- Built a restaurant queue management system with real-time updates, allowing users to join queues remotely and track wait times.
- Implemented secure user authentication using JSON Web Tokens (JWT) for protected routes.
- Integrated Leaflet maps with Geolocation API to help users navigate to selected restaurants.

Skills

Programming Languages: C, C++, Java, JavaScript

Web Technologies: HTML, CSS, Node.js, ReactJS, Express

Databases: SQL, Firebase, MongoDB

Software & Tools: Google Cloud Console, GitHub, Postman, Docker, Figma, Tableau

Leadership / Extracurricular

Logistics Head, Sports Committee, S.P.I.T.

May 2023 – June 2024

Led and coordinated a team of 100+ students to successfully organize a college marathon with over 800 participants and hosted an inter-college table tennis tournament with participation from 50+ colleges.

Executive Head, Oculus Esports

January 2024 - April 2024

Spearheaded the planning and execution of a multi-game esports tournament featuring Valorant, BGMI, and Clash Royale with high engagement and smooth event management.
