Profile

Analytical and finance-focused engineering student with a Business Foundations minor from SPJIMR. Experienced in financial reporting, market research, valuation modeling, and risk analytics. Passionate about supporting banking decisions through structured data insights and client-ready materials.

Core Skills

Financial Tools & Analysis: Valuation Modeling, Variance Analysis, Budgeting, Cost Allocation, Excel Dashboards, Power BI, Tableau
Research & Strategy: Market/Industry Analysis, Term Sheet Review, Risk Management, Strategic Planning, Business Intelligence
Technical Support: Python (Pandas, NumPy), SQL, XGBoost, Forecasting (ARIMA/LSTM), REST APIs, Git, PowerPoint
Soft Skills: Communication, Team Leadership, Attention to Detail, Time Management
Languages: English, Hindi, Marathi (fluent), German (basic)
Certifications: SPJIMR Business Foundations, Digital Marketing (Google), Generative AI (Vizuara), Building LLMs from Scratch (Vizuara)

Academic Consulting Experience

Academic Consultant – Risk Analytics & Reporting Jan 2024 – Present
SPIT + SPJIMR Joint Practicum Project Mumbai, India
– Developed dashboards for simulated government risk reports on commodity price volatility.
– Performed **variance analysis** to align predictions with real market behaviors.
– Translated raw model outputs into **policy-focused reporting** tools.
– Collaborated across technical and policy teams to maintain data accuracy and delivery timelines.

Lead Analyst – Investment Simulation & Risk Review Aug 2023 – Nov 2023
SPJIMR Practicum – Investment Strategy & BIS Mumbai, India
– Led 5-member team to simulate investments using financial statements, M&A documents, and term sheets.
– Created pitchbook-style Excel models for valuation, returns, and risk-diversified portfolios.
– Generated 5% simulated ROI and conducted health checks aligned to BIS standards.

Key Projects

Annapurna – Forecasting for Food Supply Planning Team Lead
– Built XGBoost forecasting pipeline and industry benchmarking dashboards.
– Helped simulate buffer stock planning based on volatility thresholds.
– Mapped financial and weather variables to risk indicators for planning.

Electro – Utility Demand Prediction Forecast Analyst
– Built LSTM/ARIMA models to predict regional grid loads and usage spikes.
– Enabled proactive planning for cost-efficient energy allocation.

Inventory Optimization – Hackathon Finalist ML Engineer
– Automated stock optimization using demand-driven forecasts, reducing waste by 18%.
– Converted predictions into client-facing dashboards for decision-makers.

Achievements

– **Top 10 – DataHack III.0:** Built ML-powered inventory planning tool.
– **Top 10 – DataForge 2025:** Developed demand-aware forecasting for retail use cases.
– **Black Belt – Taekwondo (Dan 1):** Demonstrated discipline and strategic mindset.

Education

S. P. Jain Institute of Management and Research (SPJIMR) 2023 – Present
Minor in Business Foundations – Finance, Strategy, Ops, Project Management, HR Mumbai, India

Sardar Patel Institute of Technology (SPIT) 2022 – Present
B.Tech. in Computer Science – Specialization: Data Science Mumbai, India
