

Ibrahim Moiz Baramatiwala

📍 Mumbai, IN ✉ ibrahim25.official@gmail.com ☎ +91 9175927612 🌐 oxy-g3n in simplyibrahim

Education

Sardar Patel Institute of Technology - <i>B.Tech in Electronics & Telecommunication</i> CGPA: 7.87/10.0	Mumbai, IN 2023 – Present
Sou. Venutai Chavan Polytechnic - <i>Diploma in Computer Engineering</i> Percentage: 89.89%	Pune, IN 2020 – 2023
Kothari National School - <i>CBSE 10th</i> Percentage: 76.00%	Pune, IN 2011 – 2020

Experience

Autobuddys

Backend and Hardware Designer Intern

Mumbai, IN

Jan 2025 – March 2025

- Worked under Dr. D.R. Kalbande developing a health monitoring system for his company Autobuddys
- Implemented fingerprint sensor authentication to identify individuals and record health parameters
- Developed embedded C programs for sensor integration and created data transmission system using HTTP requests to store health data in Firebase

Projects

PokemonGo Community Issue Tracker

February 2025

Frontend Developer & Backend Engineer

github.com/oxy-g3n [🔗](#)

- Developed a crowdsourcing platform using React Native with Expo framework enabling users to report, verify, and resolve community issues in real-time
- Architected PostgreSQL database schema in Supabase, eliminating separate backend server and reducing development time by 40%
- Implemented serverless backend functions using Supabase's PGSQL

TradeGuard — LogiTHON 2025 IIT Bombay Finalists

March 2025

Backend Developer, Data Engineer

github.com/oxy-g3n [🔗](#)

- Built compliance checker system for export businesses to verify international parcels, flagging issues in real-time
- Created data pre-processing pipeline for Gemini 1.5 Flash model enabling compliance analysis
- Implemented secure backend with Flask, SQLite, and JWT authentication for role-based access

Edura: Learning Empowered by Gamification and AI

January 2025 – Present

Lead Developer

github.com/oxy-g3n [🔗](#)

- Led frontend with Next.js 15 and React 19, creating intuitive interactive web experience
- Developed an incentive-based learning platform with gamification elements to maintain high user engagement
- Implemented SQLite3 backend with Flask API for efficient document handling and notes sharing functionality

SwiftClaim – Insurance Claim Automation

February 2025

Backend Developer

github.com/oxy-g3n [🔗](#)

- Built a SaaS platform enabling insurers and policyholders to automate claim settlements using AI and blockchain.
- Developed using React (frontend), Node.js with PostgreSQL (backend), and ABDM APIs to fetch verified hospital records for instant validation.
- Implemented a local blockchain network using Hardhat, deploying smart contracts for secure and transparent claim processing

Achievements

Winner — AlgoForge Hackathon 2025

April 2025

KJ Somaiya Institute of Technology, Mumbai

Second Place — CodeAstra 2025

March 2025

Rajiv Gandhi Institute of Technology, Mumbai

Domain Winners — App Development — PokemonGo-Community

February 2025

SPIT Hackathon 2025, Mumbai

Finalists — Cross-Border Compliance System — TradeGuard

March 2025

LogiTHON 2025 - Softlink Global, IIT Bombay

Skills

Programming Languages: C++, Java, Python, JavaScript, Matlab, Verilog, VHDL

Frameworks & Technologies: Flask, Vue, Next.js, React, React-Native, Celery, Bootstrap, Tailwind, GSAP, Framer Motion

Databases: SQLite, Firebase, Supabase

Development Tools: Git, Postman, Android Studio, Xilinx Vivado, PyCharm, Visual Studio

Others: Linux, Vercel, Prompt Engineering
