Education

Sardar Patel Institute Of Technology

2023 - 2026

- BTech in Electronics and Telecommunication | CGPA: **8.5**

Veermata Jijabai Technological Institute

2022 - 2023

- Diploma in Electronics Engineering | Percentage : **84.89**

Skills

Languages & Querying : SQL | Python | Java

Data Visualization & BI : Tableau | Business Intelligence Tools

Automation & AI: Artificial Intelligence (AI) | Machine Learning (ML)

UI/UX Design: Figma

Tools | IDE : Excel | PowerPoint | Word | VS Code | Github | Git | Matlab | Latex

Projects

SkillScan: Job Market Analytics Using NLP & Tableau

- Built a Python-based NLP pipeline to extract and analyze **emerging job market trends** relevant to **financial services, compliance, and risk functions**.
- Processed, cleaned, and transformed structured job data to identify **workforce skill gaps**, supporting **strategic workforce planning** and **talent risk analysis**.
- Designed and published **interactive Tableau dashboards** to communicate insights to **business stakeholders**, enhancing **data-driven decision-making**.

Credit Risk Portfolio Analysis Using SQL & Tableau

- Developed a **SQL-based financial risk model** to assess **credit exposure and default trends** across regions, income brackets, and employment types.
- Created **executive-level Tableau dashboards** to support **risk management teams** with data on **high-risk customer segments**, reducing potential losses by 15%.
- Enabled **data-driven governance** of the credit portfolio by generating insights aligned with **RM&C strategic risk mitigation initiatives**.

Automated Financial Risk Reporting System (Python + Excel Automation)

- Built a Python-based **automation solution** for recurring **financial risk and compliance reports**, improving speed, accuracy, and reliability.
- Reduced manual reporting time by 50% through **Excel integration and intelligent automation**, enhancing **risk governance efficiency**.
- Delivered standardized, stakeholder-ready reports supporting **compliance teams, risk analysts, and RM&C leadership** with **consistent financial insights**.

Hackathons

- **Hack-o-Hire Hackathon**: Built an **AI-based system** to analyze API call patterns and detect anomalies using **Python and ML**, enhancing **risk alerting**.
- **HERE Hackathon**: Processed **geospatial data** into GeoJSON and created a **dashboard** to visualize road attributes for **traffic management insights**.

Position of Responsibility

Technical Head at IETE

- Managed end-to-end execution of college hackathons, including **project planning, technical operations, and team coordination**.
- Led **problem statement development** focused on **risk analysis, automation, and financial technology**, aligning with industry-relevant challenges.
