

YASH JADHAV

Sambhajinagar, Maharashtra, India

+91 7447228392 yash.b.jadhav45@gmail.com

Education

Bhartiya Vidya Bhavans' Sardar Patel Institute Of Technology, Mumbai

Electronics and Telecommunication Engineering — Pursuing 3rd Year

Present

Mumbai, Maharashtra

Government Polytechnic Ahmednagar

Diploma In Electrical Engineering — 90.06

June 2023

Ahmednagar, Maharashtra

Shrinath Highschool, Paithan

SSC — 93.20

March 2017

Paithan, Maharashtra

Experience

MSEDCL Trainee

Attended Industrial Training at MSEDCL 33/11KV Solapur Road Substation, Ahmednagar

Jul 2022 - Aug 2022

Ahmednagar, Maharashtra

- Hands-on experience with electrical systems and equipment.
- Exposure to 33/11KV substation operations.
- Gained insights into the functioning of MSEDCL (Maharashtra State Electricity Distribution Co. Ltd.).

VLSI Student Training Program

Ingot Semi

Dec 2023

- Acquired in-depth knowledge of VLSI design principles, chip design, and semiconductor technology through an intensive 7-day workshop.
- Developed practical skills in VLSI design flow, circuit simulations, and layout design techniques.

Projects

Hotel Management System — Java, MySQL, Swing

Nov 2024

- Developed a Hotel Management System with features like room booking, billing, and customer management using Java for backend logic and Swing for the user interface.
- Implemented a MySQL database to handle data storage, enabling secure management of customer and reservation data.
- Enhanced the application's efficiency and security by including authentication and data validation mechanisms.

Personal Portfolio Website — HTML, CSS

Oct 2024

- Developed a responsive personal portfolio website using HTML and CSS to showcase projects.
- Built sections for Home, Projects, and Contact information to present a cohesive professional profile.

SQL-Based Banking Fraud Detection System — IRJMETs, Volume 07

May 2025

- Published a research paper in IRJMETs on a real-time fraud detection system using SQL triggers.
- Developed a risk scoring model based on transaction amount, location, and timing to flag suspicious activities.
- Enabled instant SMS alerts to customers for high-risk transactions.

Restoration of Network Theorem Experimental Setup

Feb 2023 – Jun 2023

- Restored and reassembled a non-functional experimental setup, ensuring operational readiness.
- Conducted functionality testing and documented the entire restoration process.

Isolated DC-DC Converter for IEEE IFEC 2024 Competition — Power Electronics

Ongoing

- Developing a full-bridge hybrid topology frequency and phase-shift DC-DC converter as part of the IEEE IFEC 2024 competition.
- Designed for a 400V DC input with a programmable output (20V–150V) and a maximum power of 1.5kW.
- Aiming to achieve high efficiency (>96% at 50% load), fast transient response (within 100μs), and low ripple noise.
- Implementing advanced control techniques using the TMS320F28379DPTPT control card for optimized performance.

Skills

- Programming Languages: Java, HTML, CSS.
- Software Tools: VS Code, Vivado Xilinx, Proteus, Multisim, MATLAB, Altium Designer.
