Education

Sardar Patel Institute of Technology

B.Tech in Electronics and Telecommunication; **CGPA: 7.08/10**

2023 – 2026

Mumbai, India

Veermata Jijabai Technological Institute

Diploma in Electronics; **Percentage: 82.74%**

2020 – 2023

Mumbai, India

Experience

• Intern

Jun 2022 — Aug 2022

Crompton Greaves Consumer Electricals, Ltd.

Mumbai, India

Department: - Corporate Innovation

- Work related to Arduino Uno, ESP 8266 (Wi-Fi module).
- Innovation (Research and development) of new products and Basic of Cloud computing.

• Team Lead (Project)

Jan 2025– May 2025

Sardar Patel Institute of Technology

- Led a team in developing IoT-based solutions, including Smart Cradle.
- Managed project timelines, ensured deliverable quality, and coordinated with stakeholders.

Skills

- **Technical Skills:** MS Excel, C++, Basic of Python, HTML, CSS, MATLAB.
- **Evaluation boards hands on:** - Arduino UNO, ESP 32, ESP 32 cam, ESP 8266.
- **Tools:** MS Office, Power BI, VS Code, Firebase, Supabase.
- **Other:** Data Analysis Fundamentals, Data Visualization (Power BI), Web Development, project Management, Team leadership.

Key Projects

Smart Cradle

Jan 2025 – May 2025

IoT-Enabled Environmental Monitoring system

Mumbai, India

- Developed the Snoozle project, a smart baby cradle with cry detection, auto-swing, music playback, and live camera monitoring with face detection. Controlled via a mobile app, it enhances comfort and safety for babies while aiding working parents.
- Used **Firebase** for real-time control and **Supabase** to upload songs (generate unique url's) via web

Weather Dashboard- Real-Time Data Analysis

Nov 2024 – Dec 2024

- Built a real-time weather tracking web app integrating APIs for data analysis.
- Designed a user-friendly interface for forecasting temperature, humidity, and wind speed.

Noise Energy Converted into Electrical Energy and Its Application: (Hardware)

Jan 2023 – Apr 2023

Sustainable Energy Innovation

Mumbai, India

- Designed Developed a circuit to convert noise energy into electricity, stored in a rechargeable battery via a bridge rectifier. Utilized the stored energy to power a streetlight module.

Smart Crop Protection from Animals: (Hardware)

Aug 2022 – Dec 2022

PIR Sensor-Based Alert System

Mumbai, India

- Designed a PIR sensor-based system to detect animal motion and protect crops. Integrated GSM alerts and programmed responses like activating a buzzer and lights using Arduino IDE.

Position Of Responsibility

- **Enthusia, VJTI:** - Marketing department of Enthusia.

Jun 2021 - 22
