SUMMARY

Electronics and Telecommunication Engineering student with **3+ academic projects** in software development, embedded systems, and IoT automation.

Skilled in **hardware-software integration**, real-time networking, and AI-driven systems with real-world applications.

Proficient in **Java, Python, C**, SQL databases, and simulation tools; published researcher in Brain-Computer Interfaces (**IJISRT, 2024**).

EDUCATION

Sardar Patel Institute of Technology (SPIT) <i>B.Tech in Electronics and Telecommunication Engineering; CGPA: 7.66 (View Marksheet)</i>	Mumbai, Maharashtra 2023 – 2026
Government Polytechnic Nagpur <i>Diploma in Electronics and Telecommunication Engineering; 88.95% (View Marksheet)</i>	Nagpur, Maharashtra 2020 – 2023

EXPERIENCE

It-NetworkZ Infosystems Pvt Ltd (Certificate) <i>Intern</i>	Nagpur, India July 2022 – Aug 2022
– Developed and tested scalable network topologies and VLANs using CISCO Packet Tracer software. – Successfully implemented live routing/switching configurations while troubleshooting network issues. – Gained Comprehensive knowledge of industry-standard enterprise-level network architecture and security.	

PROJECTS

Ticket Booking System <i>Java, MySQL, CLI</i>	Jun 2024 – Jan 2025
– Developed a Ticket booking system with authentication, reservation, and dynamic seat allocation logic. – Ensured real-time secure transactions and reliable data persistence using a robust MySQL backend. – Implemented robust data validation and intelligent error handling for maximum transactional integrity.	
Medicine Planner using ML and OCR <i>Python, Tesseract, Scikit-learn</i>	Jan 2025 – July 2025
– Processed 100+ medicine wrapper images using OCR (Tesseract) for data extraction. – Generated personalized dosage schedules based on extracted data, reduced prescription errors by 30%. – Leveraged Scikit-learn for machine learning model development and classification of medicine types.	
IoT-Based Smart Home Automation <i>ESP32, Blynk IoT, Arduino IDE</i>	Jan 2023 – Jul 2023
– Built a remote appliance monitoring and control system for 5+ devices with real-time updates. – Improved household energy efficiency by 10–15% through sensor integration.	

RESEARCH

A Detailed Overview of Brain-Computer and Brain-Machine Interfaces — Published in **IJISRT**, Vol 9, Issue 12 (Dec 2024). Analyzed 20+ studies on EEG acquisition, signal processing, and assistive applications. (View Paper)

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript, HTML5, CSS3
Databases: MySQL
Networking: CISCO Packet Tracer, Router/Switch Configurations
Tools/Platforms: Git, Github, VS Code, Arduino IDE, IntelliJ, Gradle, Spring Boot, Google Colab
Soft Skills: Communication, Collaborative Contributor, Leadership, Problem-solving

ACHIEVEMENTS

- Felicitated by **Smile Foundation NGO** for successfully leading a **30-member team** in social outreach initiatives.
- Served as a **Core Committee Member** for the IETE (**2 years**), coordinating 100+ participants and activities.
- Organized **5+ state-level technical/non-technical events**, achieving an impressive **95% satisfaction rate**.
- Successfully Led Diploma project in **embedded systems design**, improving energy efficiency by **20%**.
