Education

Sardar Patel Institute of Technology

B-Tech in Electronics and Telecommunication Engineering

Sep. 2023 – May 2026

Mumbai, Maharashtra

K. K Wagh Polytechnic : 88.57%

Diploma in Computer Engineering

Nov. 2020 – May 2023

Nashik, Maharashtra

Experience

R3 Systems India Pvt. Ltd

Software Engineer Intern

July 2022 – August 2022

Nashik, Maharashtra

- Built **dynamic web applications** using **Java Servlets**, **JSP**, and **MySQL** to streamline business workflows
- Delivered **responsive web applications** that improved client workflows; integrated **Java + MySQL** for data reliability and performance
- Used **JDBC** and **XAMPP** to automate data operations, reducing manual errors in backend processing with robust error handling
- Designed **websites** via **WordPress** with customized dashboards, contributing to digital transformation for **SME clients**
- Gained exposure to **client requirements analysis** and **cross-functional team communication** in agile development environments

Projects

AI-Driven Requirement Engineering System

Feb. 2025 – Apr. 2025

Built an **AI-based requirement platform** using **modular agentic architecture** for **DOCX**, **PDF**, and **audio processing**

- Extracted and classified **functional/non-functional requirements** with **MoSCoW prioritization** and traceability review
- Enabled **DOCX export**, **JIRA story generation**, and **automated test case creation** for improved development compliance
- Integrated **AI chatbot** and **dashboard** for real-time tracking, decision support, and stakeholder communication with data visualization

Tech Stack: Python, LangChain, OpenAI API, Streamlit, FastAPI, Tesseract OCR, SpeechRecognition

TradeGuard - Rapid Compliance Checker for Cross-Border Shipments

Mar. 2025 – June. 2025

Built a **compliance automation system** for **real-time risk flagging** and **trade regulation adherence**.

- Implemented **role-based access control** for compliance officers, admins, and exporters with secure workflow segregation
- Developed **interactive dashboard** to visualize compliance statistics, risk metrics, and shipment trends with custom reporting
- Automated **HS code classification** using **LLMs**; enforced 50+ trade rules across 100+ shipments, reducing review time by 70%

Tech Stack: React, Tailwind CSS, TypeScript, Python (Flask), MySQL

PokemonGo Community App - Crowdsourced Urban Issue Resolver

Oct. 2024 – Dec. 2024

Designed a **civic issue reporting app** with **geotagging**, **user discussion forums**, and **location-based smart alerts**

- Enabled **reporting and verification** of local issues (e.g., potholes, outages) with **image uploads** and **map tracking**
- Built **community solution hub** with **discussion**, **voting** for collaborative issue resolution with gamification elements.
- Integrated **smart alerts** and **proximity notifications**; supported **lost and found network** using **decentralized processing logic**

Tech Stack: React Native (Expo), Supabase

Achievements

- PS Runner-Up (2nd Place)** at **Barclays Hack-O-Hire 2025** among 1500+ competing teams
- App Domain Winner** among 600+ teams at **SPIT Hackathon 2025**
- Top 24 Finalist** at LogiTHON by Softlink Global, **IIT Bombay**
- Top 24 Finalist** at IEEE KJSIT Hackathon by **KJ Somaiya**

Technical Skills

- Languages & Frameworks :** Java, Python, SQL, React, Flask
- Tools & Platforms:** GitHub, VS Code, Android Studio, Postman, PHPMyAdmin , Google Colab , JIRA (Basic)
- Databases:** MySQL, Supabase

Publication

"Water Metering and Water Quality Checking Using IoT" – Published in IJSREM, April 4, 2023. **Volume:** 07, **Issue:** 04, **Impact Factor:** 8.176 **ISSN:** 2582-3930
