## Summary

An Electronics Engineering student at Sardar Patel Institute of Technology, with expertise in circuit design, digital systems, and programming. Proficient in Java, Python, web development, networking, and IoT protocols. My project work, including IoT-based automation and industrial training, has refined my skills in automation, control systems, and electronics integration.

## Education

### Bhartiya Vidya Bhavan's Sardar Patel Institute of Technology

Bachelor of Engineering in Electronics and Telecommunication

2026 (Expected)

Mumbai, Maharashtra

### Government Polytechnic

Diploma in Electronics and Telecommunication Engineering

2023

Amravati, Maharashtra — 86.84%

### Montfort School

Secondary School Certificate (SSC)

2020

Dharni — 80.40%

## Experience

### Teaching Assistant

Sardar Patel Institute of Technology

March 2024 – December 2024

Mumbai, Maharashtra

- Supported course instruction by assisting students with assignments, labs, and technical concepts.
- Provided guidance in electronics and programming topics, reinforcing foundational skills.

### RattanIndia Power Limited

Industrial Trainee

July 2022 – August 2022

Amravati, Maharashtra

- Conducted a 60-day training program gaining knowledge in power generation and control systems.
- Contributed to projects improving the efficiency of power generation systems.
- Enhanced understanding of safety protocols and environmental regulations.

### Robotics Internship

Kodacy.com

September 2022 – October 2022

Kerala (Remote)

- Designed and implemented a line-following robot, showcasing proficiency in movement algorithms.
- Developed a robotic arm controlled via a touch screen, demonstrating skills in human-machine interaction.

## Projects

### IoT-Based Smart Automated Classroom

Government Polytechnic

July 2022 – February 2023

Amravati, Maharashtra

- Developed a smart classroom with IoT automation for curtains, lighting, and fans using ESP32 and Raspberry Pi 4.
- Implemented MQTT protocol for secure data transfer and automatic attendance using RFID/Bluetooth.

### I2C Interfacing with Temperature Sensor Using FPGA

Sardar Patel Institute of Technology

January 2024 – May 2024

Mumbai, Maharashtra

- Demonstrated I2C communication protocol integration with a temperature sensor on an FPGA platform.

## Technical Skills

**Programming Languages:** Java, Python, HTML/CSS, JavaScript

**Developer Tools:** VS Code, Xilinx Vivado, MATLAB, Proteus

**Technologies:** GitHub, Excel, MQTT, HTTP, TCP/IP, Modbus, LoRa

**Circuit Design Tools:** SPICE, Multisim, Altium, KiCAD, Eagle

**Embedded Systems:** Raspberry Pi, ESP32, PIC Microcontrollers, ARM Cortex

## Languages

English (Professional Proficiency)

Hindi (Native Proficiency)

Marathi (Native Proficiency)
