## Summary

Final-year B.Tech student in Electronics and Telecommunication, skilled in Java and Android application development. Experienced in building native Android apps using Java and Kotlin, and full-stack web applications with HTML, CSS, JavaScript, Node.js, and MySQL. Proficient in database design, REST API integration, and cloud deployment. Represented India at the **IEEE International Future Energy Challenge 2025** in Taiwan, **Winner of the Team Collaboration Excellence Award** and ranked among the top 7 global teams.

## EDUCATION

**Sardar Patel Institute of Technology, Mumbai University** **Mumbai, India**  
*B.Tech in Electronics and Telecommunication Engineering - CGPA - 7.37* *Expected May 2026*

**Puranmal Lahoti Government Polytechnic, Latur** **Latur, India**  
*Diploma in Electronics Engineering - Percentage - 86.76%* *May 2023*

## TECHNICAL SKILLS

**Languages:** Java, C, Python  
**Web Development:** HTML, CSS, JavaScript, Node.js, REST APIs  
**Frameworks & Libraries:** Tailwind CSS, Bootstrap, Kotlin  
**Databases:** MySQL, Supabase  
**Developer Tools:** Git, GitHub, VS Code, IntelliJ IDEA, Eclipse, Android Studio  
**Other Skills:** Microsoft Excel, Microsoft PowerPoint, Microsoft Word, Overleaf, Canva

## PROJECTS

**IFEC Smart Converter Control App** | Kotlin, Java, Android Studio (IEEE IFEC 2025) **Jan 2025 – Jul 2025**

- Built an Android app to wirelessly control a DC-DC converter via ESP8266.
- Created a clean Material Design UI with controls for voltage, power, and monitoring.
- Used Retrofit + OkHttp for real-time communication and Gson for JSON parsing.
- Integrated MPAndroidChart for live voltage/current graphs.
- Applied ViewModel + LiveData for smooth, real-time UI updates.

**HotelDesk - Hotel Management System** | HTML, CSS, JavaScript, Node.js, MySQL **Aug 2024 – Nov 2024**

- Developed a responsive web application for managing hotel check-ins, room bookings, and billing.
- Built the frontend with HTML, CSS, and JavaScript, ensuring a mobile-friendly and intuitive interface.
- Built backend in Node.js with REST APIs to connect frontend and database.
- Used MySQL for secure storage and fast retrieval of guest and booking data.

**Banking Fraud Detection System** | Java, MySQL, REST APIs **Mar 2025 – May 2025**

- Analyzed 100+ daily transactions to flag suspicious activity using SQL triggers and risk scoring.
- Implemented REST API endpoints for transaction checks and real-time fraud alerts.
- Designed a MySQL schema for secure storage and fast query execution under load.

## AWARDS AND RECOGNITION

- Team Collaboration Excellence Award, IEEE IFEC 2025:** Won a global award at the International Future Energy Challenge in Taiwan, recognized as one of the top 7 teams worldwide.
- Top 12 Rank, SE Hackathon 2024:** Placed in the top 12 for strong problem-solving and coding skills in a competitive hackathon.
- 1st Prize, State Level Research Paper Presentation (2023):** Awarded for the innovative “IoT-Based Smart Wheelchair” project.

## PUBLICATIONS

- SQL-Based Banking Fraud Detection System:** Published a research paper in the *International Research Journal of Modernization in Engineering Technology and Science (IRJMETS)*, Volume 07, detailing a real-time fraud detection system using SQL triggers and a risk-scoring model.
