### EDUCATION

|                                                           |                                                    |                |
|-----------------------------------------------------------|----------------------------------------------------|----------------|
| Sardar Patel Institute of Technology, Mumbai              | <b>B.Tech in Electronics and Telecommunication</b> | 2023 – Present |
| Government Residential Women's Polytechnic College, Latur | <b>Diploma in Electronics and Communication</b>    | 2020 – 2023    |

### EXPERIENCE

- IIoT Intern** | *Go Green Technologies* May 2025
- Worked with multiple industrial sensors and performed soldering of electronic components, ensuring reliable connections and robust hardware assembly for embedded systems.
  - Implemented a Real-Time Operating System (RTOS) on the ESP32-WROOM-32 development kit, enabling efficient task scheduling, process synchronization, and improved system stability.
  - Gained hands-on exposure to Industrial Internet of Things (IIoT) by integrating sensors, hardware, and software into scalable solutions for industrial automation and monitoring.
- Industrial Trainee – Robotics and AI** | *My Equation – RoboAI Training Program* Jan 2025 – Feb 2025
- Completed structured industrial training in Robotics and AI, focusing on embedded systems and intelligent automation using ESP32 and microcontroller platforms.
  - Designed and integrated hardware–software modules for robotics projects, including sensor interfacing and actuator control, improving system accuracy and performance.
  - Explored AI-driven robotics applications, strengthening understanding of real-world robotics, machine learning integration, and industry-standard development practices.
- Intern – Industrial Training** | *Saitronics Karad, Karad, IN* Jul 2022 – Aug 2022
- Learned and applied PLC programming concepts for automation, gaining knowledge of industrial control processes and structured programming methods.
  - Designed and tested Printed Circuit Boards (PCBs) and LED display boards using Arduino and NodeMCU, enabling real-time data monitoring and visualization.
  - Contributed to IoT-based prototypes by integrating sensors and communication protocols, strengthening practical skills in embedded systems development and troubleshooting.

### PROJECTS

- Smart Room Temperature Controller for Industries**
- Automated system using temperature sensors to regulate industrial room conditions efficiently.
  - Dynamically adjusts cooling/heating equipment to maintain optimal temperature, improving energy efficiency and stable working conditions.
- Traffic Light Controller with Nail Protector**
- Designed a traffic control system integrated with a nail barrier mechanism and IR sensors.
  - Prevents vehicles from violating traffic signals by deploying nail barrier at red lights, enhancing road safety.
- Obstacle-Avoiding Robot with Environmental Monitoring**
- Built a mobile robot with ultrasonic sensors for obstacle detection and avoidance.
  - Integrated temperature and humidity sensors for real-time monitoring, useful in surveillance and hazardous environments.

### SKILLS

**Programming:** Embedded C, PLC Ladder Logic

**Tools & Platforms:** Arduino IDE, Thonny IDE, TinkerCAD, Blynk, ThingSpeak, MQTT Broker, Canva, Video editing software,

**Technologies:** Embedded Systems, IoT, PCB Design, Sensors, ESP32, ESP8266, Raspberry Pi, FreeRTOS, Robo-AI

**Soft Skills:** Communication, Time Management, Adaptability, Flexibility

### CERTIFICATIONS

|                                                            |                     |
|------------------------------------------------------------|---------------------|
| <b>Robotics &amp; AI Training – My Equation</b>            | Jan 2025 – Feb 2025 |
| <b>TCS iON Career Edge – TCS iON</b>                       | Aug 2023            |
| <b>Future Workspace Skills – American India Foundation</b> | Nov 2022            |

### EXTRACURRICULAR ACTIVITIES

|                                                                        |             |
|------------------------------------------------------------------------|-------------|
| <b>1st Position – Shark Tank (Idea Presentation), Alchemy 25, VJTI</b> | Mar 2025    |
| <b>Member – IETE Forum</b>                                             | 2021 – 2023 |
| <b>Educational Secretary – Board Level</b>                             | 2021 – 2022 |
| <b>Committee Member – Anti-Ragging Committee</b>                       | 2021 – 2022 |
