

MANJIRI CHAVANDE

Mumbai, Maharashtra

 github |  manjiric.vercel |  linkedin |  cmanjiri1912@gmail.com |  leetcode

Technical Skills

Languages: Java, JavaScript, TypeScript, SQL, C/C++
Frameworks & Libraries: React, NodeJS, ExpressJS, RxJs
Databases: MongoDB, Supabase (PostgreSQL)
DevOps & Tools: Git/GitHub, Docker, AWS, Ansible, Linux Shell Scripting
Testing: Karma, Jasmine, Unit Testing
AI: Large Language Models (LLMs), Generative AI

Experience

Fyle **Jan 2023 – Jul 2023**

Front End Developer Intern

Remote | Bangalore, India

- Enhanced application performance by optimizing and refactoring critical components, resulting in 30% reduced latency and improved user experience and retention
- Implemented robust error handling mechanisms to resolve and prevent payment-related issues, improving system reliability and user satisfaction
- Boosted code quality by increasing unit test coverage from 18% to 70%, ensuring scalable and reliable platform functionality
- Collaborated with cross-functional teams to identify and resolve Sentry-reported errors, implementing proactive monitoring for critical payment workflows

Diploma Tech Community **Jul 2022 – Aug 2023**

Team Open Source

Mumbai, India

- Contributed to collaborative open-source projects with focus on code quality and performance optimization
- Conducted thorough code reviews to maintain high quality standards and ensure system scalability

Projects

 **BlockSpirit - Payment Platform** | *Ethereum, ether.js, Hardhat, Sepolia eth, MetaMask*

- Designed and developed a decentralized payment application enabling secure, efficient cross-border transactions with complete transparency and audit capability
- Implemented local payment method integration and optimization strategies, improving transaction success rates and user adoption

 **RippleFeed - Platform Optimization** | *Next.js, TypeScript, Tailwind CSS, MongoDB Atlas, Prisma*

- Built a high-performance social platform with optimized database architecture and query patterns for maximum scalability
- Utilized Prisma ORM for efficient database operations, significantly reducing load times and improving overall system responsiveness
- Designed and implemented performance monitoring tools to identify and resolve bottlenecks, ensuring consistent platform reliability

 **The Eternal Guidance - Mobile Platform** | *Java, Android Studio, Firebase*

- Developed a scalable educational mobile platform with integrated payment processing for content purchases
- Implemented robust authentication and transaction handling systems to ensure secure payment operations

Education

Sardar Patel Institute of Technology, Mumbai

Aug 2023 - May 2026

BTech, Computer Engineering

CGPA : 8.84/10

Government Polytechnic Mumbai

Dec 2020 - Jul 2023

Diploma, Computer Engineering

Percentage : 96.33%

Achievements

ScrollHacks Global Hackathon **September 2024**

- Achieved "Best Beginner Team" award in the Open Innovation Track among over 500+ participants
- Winner of the Orkes Track for demonstrating innovative use of platform services and optimization techniques
- Developed **StateCraft**, a scalable educational platform with optimized architecture for real-time visualization and improved user engagement
