EXPERIENCE

Senior Executive, Godrej Energy Solutions	2021 - 2023
Electricals and Electronics Division, Godrej Enterprises Group.	Vikhroli, Maharashtra
- Worked as a Business Development Engineer in the Godrej Energy Solutions Business, leading energy optimization projects for B2B clients and driving revenue growth through market research and strategic sales initiatives. Executed 50+ energy conservation projects that saved over 350 MWh by conducting technical studies and analysis to provide energy-efficient solutions, leveraging effective project management and team collaboration.	

PROJECTS

Discounted Cash Flow Valuation of Tesla
Developed a DCF model using industry peers and historical data for delivery assumptions, and calculated WACC to determine the enterprise value, equity value, and price per share from Unlevered free cash flow.
EcoWatts – Smart Energy Management System
Implemented a machine learning-based energy management system to forecast, optimize, and analyze electricity usage using historical data, enabling anomaly detection and intelligent energy-saving recommendations at household level to improve overall efficiency.
MotoDesk - Automotive Dealership Sales Management System
Created an integrated software platform for automotive dealerships with real-time BI dashboard, unifying inventory, CRM, sales tracking, and analytics to enhance operational efficiency, data visibility, and data-driven decision-making.
