WORK EXPERIENCE

Blackstone – Game Designer and Programmer Intern

Summer 2022

- Created 60+ custom 2D/3D game assets and prototypes in Unity for multiple titles, showcasing adaptability across design and development.
- Collaborated cross-functionally to integrate C# scripts and resolve gameplay bugs, demonstrating ownership, problem-solving, and production-focused execution.

PROJECTS

DockerTool: Real-Time Container Monitoring — *Python, Docker SDK, JSON, NodeJS*

- Engineered a real-time analytics system to monitor Docker containers, capturing CPU, memory, and network metrics using Python and Docker SDK.
- Automated stat collection and export via structured JSON for seamless frontend visualization using a custom NodeJS dashboard.
- Implemented threshold-based auto-stop for scalability testing, enhancing DevOps observability and showcasing backend scripting, orchestration, and full-stack integration.

Gemhire: Employee Hiring Platform for the Diamond Market — *PocketBase, ReactJS, RazorPay*

- Developed a web application using ReactJS and PocketBase for connecting companies and employees in the diamond industry.
- Implemented features such as dynamic dashboards, user authentication, and news integration.
- Integrated web scraping to populate the platform with diamond industry news and generated insights based on the scraped news.

Arista Solutions Security Systems — *Node.js, Express.js, Tailwind, Material*

- Sponsored major project — built a dynamic e-commerce platform with secure user and admin flows.
- Users can browse products, subscribe to newsletters, and sign in using Google OAuth.
- Admin dashboard includes product management, and review moderation.
