EDUCATION

Sardar Patel Institute of Technology

Aug 2023 – May 2026

- *Bachelor of Technology in Computer Engineering*, CGPA: 8.3/10.00

Shri Bhagubhai Mafatlal Polytechnic

Aug 2020 – May 2023

- *Diploma in Electrical Engineering*, CGPA: 9.67/10.00

EXPERIENCE

Full Stack Developer Intern - Fyre Gig | [Link](#)

Apr 2025 – Jun 2025

- Developed and integrated **RESTful APIs** using **Python, Django, Flask, React, and Tailwind CSS** to enhance the functionality of the platform.
- Contributed to building a platform similar to Unstop with additional features such as certifications, courses, and skill-based internship matching.

SDE Intern - Bidyut Innovations

Jan 2025 – Jun 2025

- Developing an **AI-powered website** for interactive robot customization and integrating a **Learning Management System** with personalized course recommendations, boosting **user engagement by 70%**.
- **Configured and deployed AWS services** to ensure scalable backend infrastructure and secure data storage.

PROJECTS

API Anomaly Detection | *FastAPI, LSTM, Docker, ELK Stack, SHAP* | [Github](#)

Apr 2025

- Developed an **LSTM based anomaly detection system** that identified failures in API time-series logs with **92%+ accuracy**, integrating **SHAP** for model explainability.
- Enabled latency heatmaps, **API cost tracking**, and **carbon footprint monitoring** for smarter diagnostics and sustainability. Deployed in a containerized, scalable setup with **Kibana dashboards** to track performance and usage trends.

RECreate | *React.js, Solidity, Dart, Firebase* | [Github](#)

Dec 2024

- Built a blockchain-based **B2B & P2P energy trading** platform simulating **1000+** monthly REC transactions (locally tested), featuring mobile access and ERC-20 tokenization.
- Integrated Reclaim Protocol for **zk-proof validation**, **reducing fraud** and deployed **AI agents** for automated on-chain credit scoring.
- Added ML-based energy forecasting (**85%+ accuracy**), **blind-accessible** & multilingual UI, smart home control, and gamified rewards.

Carbon Emission Control | *React.js, Node.js, MongoDB, Gemini API* | [Github](#) | [Link](#)

Nov 2024

- Built a comprehensive **sustainability platform** with **10+ features**: energy tracking, smart home control, carbon analytics, and secure bill storage.
- Enabled Gemini chatbot, **carbon analytics**, and **blockchain bill verification** for secure real-time insights.
- Enabled carpooling, green shopping, and reward-based gamification—boosting **1.5× user engagement** and **reducing CO2 emissions by 20% - 30%**.

SKILLS

Programming Languages: C, Python, Java, SQL, JavaScript

Web & Frameworks: React.js, Node.js, Express.js, Tailwind, RESTful APIs, JWT

Databases: MySQL, MongoDB, Firebase, PostgreSQL

Tools & Platforms: Git, GitHub, Postman, Docker

ACHIEVEMENTS

Finalist – Barclays Hack-O-Hire 2025 - Selected among **1200+** teams. | [LinkedIn](#)

Apr 2025

2nd Place – SPIT Hacks 2025 - Among **350+** teams across India. | [Github](#)

Feb 2025

2nd Place – TSEC Hacks 2025 — Outperformed **400+** participants. | [Github](#)

Jan 2025

2nd Place – East India Blockchain Summit 2025 (IIT Kharagpur) | [Github](#)

Jan 2025

Winner – HackAurora 2024 (VJTI Technovanza) — 1st place among **500+** entries. | [Link](#)

Dec 2024
