

SWARANGI SHIRSEKAR

+91 90042 66739 | shirsekarswarangi@gmail.com | LinkedIn | GitHub

EDUCATION

- Bhartiya Vidya Bhavans Sardar Patel Institute of Technology, Mumbai** (2022 - 2026)
B. Tech in Computer Engineering, CGPA: 8.00
- K. J. Somaiya Polytechnic, Mumbai** (2021-2023)
Diploma in Computer Engineering, Percentage: 95.9%

EXPERIENCE

- DB Intern - Unlock Discounts (Remote)** (Nov 2024 – Jan 2025)
- Designed and managed a MySQL database of 500+ discounted product records from multiple e-commerce platforms.
 - Ensured relational integrity by applying constraints and streamlined product entry using Python scripts.
 - Validated admin panel CRUD functionality to ensure accurate backend synchronization.
- Core Java Developer Intern – Upskill Campus & Uniconverge Technologies (Remote)** (June 2023 – July 2023)
- Implemented a modular console-based banking system managing account creation, fund transfers with robust user input validation to ensure data integrity
 - Applied OOPs principles and integrated structured exception handling to simulate real-world banking operations such as deposits, withdrawals, balance inquiry. Also, manage edge cases and enabling accurate transaction flow
- Web Development Intern - CommTel Networks, Navi Mumbai** (July 2022 – Aug 2022)
- Created a dynamic request form to handle digital asset categories with diverse user input types.
 - Enhanced interactivity for smoother user experience using jQuery and Chosen.js and reduce input error by 40%.

PROJECTS

- Heart Disease Prediction | Flask, ML** [🔗](#)
- Analysed 300+ patient records to extract statistically significant features and achieve a 98% accuracy in heart disease prediction by conducted EDA with pandas-profiling, handled missing values, remove outliers and feature selection.
 - Enabling clearer decision-making by narrowing inputs to the 10 most relevant health indicators.
- Railway Complaint Classification and Sentiment Analysis System | ML/DL, NLP** [🔗](#)
- Trained models 76% sentiment accuracy using Multiclass Logistic Regression (SGDClassifier), Accelerated allocation of complaints to relevant departments by achieving 90% with Gradient Boosting, and built an image classifier with 75% NPV and specificity using DenseNet201
 - Cleaned 1000+ text complaint using NLP and vectorize using TF-IDF; Curated single-labelled image dataset with resizing and auto-orientation of training data
- EventScout System | Flask, MongoDB** [🔗](#)
- Engineered a web application featuring real-time event creation and user registration using RESTful APIs, while ensuring secure user authentication via JWT.
 - Also provide features like browsing, event sharing with seamless user experience for both organizers and attendees.
- Roundabout Detection | QGIS, Google Colab** [🔗](#)
- Automated roundabout detection from polygonal shapefiles using circularity metrics with 95% match accuracy while reducing manual mapping efforts by 80%.
 - Follow a spatial processing pipeline involving densify, multi-part splitting, cKDTree snapping, node linkage using QGIS. Reconstruct NetworkX edge-based graph to generate GeoJSON outputs.

SKILLS

- Languages:** Python, Java, SQL
- Web Development:** HTML, CSS, Tailwind CSS, Flask, Django
- Databases:** MySQL, MS SQL Server, MongoDB
- AI/ML & Data Science:**
- Techniques: Machine Learning, Deep Learning, Natural Language Processing (NLP)
 - Libraries & Frameworks: Pandas, NumPy, SciPy, Scikit-learn, Matplotlib, Seaborn
- Tools & Technologies:** VS code, Visual Studio, PyCharm, Postman, Git, Jupyter Notebook, Google Colab, Tableau

ADDITIONAL COURSES & CERTIFICATIONS

- Data Science Course - Intech Academy, Ghatkopar** (2024 - Ongoing)
- Covered Python, DSA, EDA, ML algorithms, feature engineering and model building.

ACHIEVEMENTS AND EXTRACURRICULARS

- Selected among 30 Finalist Teams in Hackathon organized by Here Technologies
- Volunteer – “College to Corporate” Minors Program by JPMC Chase.
- Ranked as Top 10 finalist in GMRT Science Day State-Level Exhibition, Pune
