EDUCATION

Institute	Degree/Certificate	Year	Marks
Sardar Patel Institute of Technology, Mumbai	B.Tech in Computer Science (AIML)	2023–2026	8.52/10
Government Polytechnic Mumbai, Mumbai	Diploma in Computer Engineering	2020–2023	95.17%
The Scholar's English High School, Thane	Maharashtra State Board	2007–2020	89.80%

EXPERIENCE

Indian Navy HQ (Contract via General Technologies)

Jan - June 2023

Jr. Software Engineer

Onsite, Fulltime at Mumbai (Indian Navy HQ)

- **Designed and implemented full-stack applications** (ASP.NET Core, C#, Node.js, MySQL) by interpreting complex requirements into **object-oriented architectures**, integrating secure authentication (**LDAP**), and ensuring compliance with operational and safety standards.
- **Delivered \$20K+ annual cost savings** by refactoring and optimizing code, eliminating third-party dependencies, and maintaining full compliance with defense and industry standards.
- **Provided technical support and troubleshooting** for mission-critical applications, collaborating across functional teams to resolve system issues, ensure operational stability, and adhere to safety and quality protocols.

OPEN SOURCE CONTRIBUTIONS

Keyshade

[Pull Request](#)

- **Architected and deployed Redis caching module** that **reduced authentication response time by 15%**, enhancing user experience for thousands of concurrent users in production NestJS application
- **Maintained production-grade code quality** through peer code reviews, proactive issue resolution, and adherence to **test automation** and enterprise development standards.

PROJECTS

IPL Auction - Real-Time IPL Auction Platform

[Github](#)

Tech Lead – Full-Stack Development

ReactJS • Express • NodeJS • MongoDB

- **Architected and led** development of a **real-time IPL auction platform** using WebSockets, React, and Node.js, coordinating a **cross-functional team of 4**.
- Attracted **interest from two organizations for the platform's innovative design** and user experience.
- Designed complex yet intuitive interface and System design supporting **100+ concurrent users** with real-time bidding.

Data Rakshak - Sensitive Data Detection and Masking Tool

[Github](#)

Smart India Hackathon • Extended Microsoft Presidio

ReactJS • Python • Flask • SpaCy • Hugging Face • Tesseract • Docker

- Designed multilingual **Personally Identifiable Information (PII) detection system** for Indian government documents, integrating **BERT-based NER models** to improve accuracy on Hindi and regional languages, and ensuring compliance with data protection and privacy regulations.
- Built automated **OCR redaction pipeline** using **Tesseract** and **OpenCV** to process scanned documents with degraded quality, increasing precision of sensitive data removal.

DSABuddy - AI-Powered Problem Recommendation System

[Peerlist Hackathon Submission](#)

ML & Backend Developer

ReactJS • Python • MongoDB • Flask • Scikit-learn • Gemini AI

- Ranked **#8 nationally** in **Peerlist Hackathon** by building an AI-powered coding practice platform that personalizes problem recommendations based on user performance.
- Developed ML recommendation engine using **Random Forest models** to analyze 20+ metrics (difficulty preference, solving patterns, time complexity) and predict optimal next problems with **85%+ accuracy**.

TECHNICAL SKILLS

Frontend: ReactJS, Angular, TypeScript, JavaScript, HTML, CSS, Tailwind

Backend: NodeJS, Express, Java, Python, C++

Databases: MySQL, Redis, MongoDB, MS SQL Server

Tools: Linux, Git, Docker, GitHub, Neovim, Ansible, Jenkins

ACHIEVEMENTS

Smart India Hackathon National Finalist - Advanced to finals among top 50 teams from 1,600+ nationwide submissions

Peerlist Hackathon #8 Nationally - Ranked among top 10 from 500+ participants for AI-powered DSA learning platform

ScrollHacks Winner - 1st Runner-up and Orkes Integration Award recipient for innovative technical solution

Logithon DMCE Finalist - Selected among top teams from 1,600+ submissions in premier college hackathon

Open Source Contributor - Active contributor to Keyshade project during FOSSHACK'24
