Education

Sardar Patel Institute of Technology - CGPA : 7.21

August 2023 – June 2026

Bachelor of Technology - Computer Science and Engineering (Data Science)

Andheri, India

Navjeevan Education Society's Polytechnic - Percentage : 93.54

December 2020 – July 2023

Diploma in Engineering - Computer Engineering

Bhandup, India

Experience

Sardar Patel Institute of Technology

February 2025 – June 2025

Teaching Assistant

Andheri, India

- EVE-NG Software Configuration and Management
- Software Defined Radio (SDR) Technology Implementation
- Working with Cisco Router and Switch Images
- GNS3 Installation and Network Simulation Configuration
- Project Work in Networking and SDR Applications

Bloomzen Infosolutions Pvt Ltd

July 2022 – August 2022

Python Development Intern

Thane, India

- Worked on real-world Python projects involving data manipulation, automation, and script development.
- Built mini-projects using Python such as calculators, login systems, or data parsers to strengthen foundational skills.
- Used libraries like pandas, numpy, matplotlib for basic data analysis and visualization tasks.
- Collaborated using Git & GitHub, understanding version control and team workflows.
- Handled JSON, CSV, and Excel files for data input/output operations.
- Participated in code reviews and daily stand-ups, gaining exposure to agile methodology.

Projects

Cleverly Estate | *Javascript, React.js, Express.js, JWT, MongoDB, Firebase*

November 2024

- Built a full-stack platform for property listings (sale/rent) with advanced features and authentication.
- An complete web application which allows user to list Properties for Sale or Rent and Advertise the properties with multiple Features.
- Stored Images on Firebase and user Authentication Details on MongoDB.

CodeBox | *AWS S3, Socket.io, AWS-sdk, Node-pty, Javascript, React.js*

May 2025

- This project is an online compiler where users can run code in multiple languages on a server from any location using a web interface built with React.
- It supports creating, editing, and deleting files stored securely in an AWS S3 bucket.
- The backend uses Node.js, Express.js, and Node-pty to handle code execution and file operations.

Speed Detection System | *Python, Arduino C, OpenCV, HTML/CSS*

December 2022

- This project aims to develop a Vehicle License Plate Recognition and Speed Detection system using Arduino and IR sensors to monitor traffic violations and enhance road safety.
- Two IR sensors placed at a fixed distance detect when a vehicle passes; Arduino calculates speed using the time difference between the sensors.
- When a vehicle is detected, the IR sensor triggers a camera module to capture an image of the license plate, which is processed using OpenCV and Fine is Applicable to User .

Technical Skills

Languages: Python, Java, C, HTML/CSS, JavaScript

Technologies: Machine Learning

Frameworks: React, Node.js, Express.js, Tailwind CSS, Bcrypt.js, Tkinter

Databases: MongoDB, MySQL, Firebase

Tools: VS Code, Postman, Git, Github, Android Studio, Firebase Console

Achievements / Extracurricular

- Participated in Here Technologies Hackathon and Nomura KakushIN Hackathon (2025)
- Karate (Brown Belt) : Multiple-time State and District Champion. (2014 - 2022)
- Professional Powerlifter : State Merit and District Champion (2022 - 2025)
