EDUCATION

Sardar Patel Institute of Technology

B.Tech. in Computer Science and Engineering

Sept 2023 – May 2026

7.07/10 CGPA

Puranmal Lahoti Government Polytechnic Latur

Diploma in Information Technology

Aug 2020 – June 2023

92.13 Percentage

EXPERIENCE

RAG Engineer

NoCnx Technologies

July 2025 – Present

- Preprocessing of unstructured documents
- Designed and implemented a custom RAG pipeline
- Pipeline Deployment using FastAPI
- Conducted experimentation with open-source Large Language Models (LLMs) to enhance efficiency, scalability, and accuracy of RAG-based applications.

Web Developer

Bright Infotech

July 2022 – Aug. 2022

- Acquired practical experience in frontend (React.js, HTML, CSS, JavaScript) technologies through project development.
- Developed and deployed web applications with optimized backend integration, efficient API handling, and enhanced UI to improve user experience and functionality.

PROJECTS

CropCaster | *CropCaster successfully delivered a predictive tool for farmers to forecast crop yields with high accuracy*

- Designed and implemented a K-Nearest Neighbors (KNN) model for crop yield prediction using historical agricultural and environmental data
- Performed data preprocessing, cleaning, and feature engineering with Python (Pandas, NumPy, Scikit-learn)
- Achieved high predictive accuracy through careful hyperparameter tuning and model validation
- Developed interactive dashboards using React.js and Next.js, enabling farmers to visualize predictions and make informed decisions

BeatSafe | *BeatSafe predicts sudden cardiac arrest early using ECG analysis and machine learning(With Two approaches)*

- Stacked ensemble learning with base learners: RandomForest, XGBoost, LightGBM, ExtraTrees, SVM; meta-learner: MLPClassifier
- CNN-based deep learning model for ECG time-series classification using TensorFlow/Keras
- Deployed the predictive pipeline via FastAPI, supporting real-time ECG streaming and inference
- Developed the frontend using React.js, Next.js, and CSS, providing real-time dashboards and alerts for patient monitoring

TECHNICAL SKILLS

Languages: Java, Python, C/C++, PHP

Frameworks: ReactJs, NodeJs, Flask, WordPress, Material-UI, FastAPI, Astro, Qwik

Developer Tools: Git, GitHub Actions, Docker, VS Code, Google Colab, Eclipse, Figma, Canva, Postman

Databases: SQL, MongoDB

POSITION OF RESPONSIBILITY

Student Council | *General Secretary*

2022-2023

- Served as General Secretary of the Student Council, coordinating student activities, organizing events, and driving initiatives to enhance campus engagement.

CERTIFICATIONS

- Machine Learning Self-Driving Cars: Bootcamp with Python
- Big Data Hadoop
