EDUCATION

Sardar Patel Institute Of Technology, Andheri

B.Tech - Computer Science and Engineering (Data Science), CGPA: 8.7

2023 – Present

Andheri, Maharashtra

M.H. Saboo Siddik Polytechnic, Byculla

Diploma - Computer Engineering - Percentage - 92.06

2020 – 2023

Byculla, Maharashtra

EXPERIENCE

Intern at Study League IT Solutions | HTML, CSS, JavaScript, PHP

June 2022 – August 2022

Role: Software Developer

Dombivli, Maharashtra

- Designed and developed a **Fees Management System** to streamline fee collection and reporting across multiple branches, enhancing operational efficiency.
- Utilized **MySQL** to write complex queries for efficient database management, ensuring data consistency and accuracy.
- Implemented backend functionality using **PHP** and configured the **XAMPP server** to connect the frontend with the database for seamless data retrieval.

PROJECTS

Far-E-Wala | ReactJs, HTML, CSS, Firebase, Mapbox

- Built a platform connecting local vendors with consumers using GPS technology for accurate location-based services and seamless transactions.
- Integrated an interactive map interface for easy navigation and real-time notifications to keep users informed about vendor availability.
- Enhanced user experience with efficient location tracking and intuitive design.

AI Portfolio Builder | ReactJs, Python, JavaScript, Gemini, Flask, Netlify API,firebase

- Automatically extracts and imports relevant data from resumes and GitHub profiles to streamline the process of profile creation.
- Leverages artificial intelligence to create a polished, ready-to-use portfolio that highlights skills, experience, and achievements effectively.
- Enables seamless, one-click integration with Netlify for fast and efficient publishing of your portfolio to the web.

Korean Skin Analysis Project | ReactJs, HTML, CSS

- Developed a Korean skin analysis platform enabling users to upload a photo for comprehensive analysis based on skin, eye, and hair color.
- Provides a personalized seasonal color palette, recommended lipstick shades, and foundation match.
- Users can virtually apply colors to their photos to see which shades suit them best.

BlogGenie | React, Flask, LLaMA, Gemini, Tavily API, Pexels API, Telegram API

- Developed an AI-powered blog platform with LLaMA and Gemini for content generation, Tavily for trending topics, and Pexels for multimedia integration.
- Automated workflows for blog review, publishing, and Telegram notifications, with features like tone control, multi-language support, and draft auto-save.
- Added a user analytics dashboard to enhance blog creation and management.

TECHNICAL SKILLS

Languages: C/C++, Java, Python, JavaScript, Php, SQL

Technologies/Frameworks: ReactJs, Flask, Material-UI, Firebase, GitHub, TensorFlow, PyTorch, Scikit-learn

Developer Tools: VS Code, Canva, Android Studio, Figma

Certifications: Python Coding Course by Suven Consultants and technology Pvt Ltd

ACHIEVEMENTS

2nd RunnerUp at VISTA 2025 Hackathon, hosted by TCET

2025

First Prize in State Level Technical Paper Presentation on “Robotics”

2022

First Prize in MECH STORM - State Level Technical Paper Presentation on “AI Job Finder - Connecting You”

2023

Top 20 Finalist out of 200 participants at Webathon, a web development hackathon hosted by MHSSP

2024
