Projects

Neura-Life – AI Mental Healthcare Platform

Cross-platform application automated documentation, health tracking, and therapy sessions.

- Built deep learning models for **automated transcription and summarization**, achieving high accuracy with Google Speech-to-Text.
- Developed a **doctor recommendation model** based on patient input to enhance user experience.
- Integrated these models seamlessly into a **Flutter app**, contributing to its functionality for video consultations, health tracking, and more.
- Reduced doctor note-taking time by 60 percent with a custom BART summarizer for automated documentation.
- Collaborated with **doctors and researchers**, conducting **5+ interviews** and reviewing **10+ papers** to understand user needs and market gaps.
- To better understand user needs and market gaps, I worked with **doctors and researchers**, conducting **5+ interviews** and reviewing **20+ papers**.

Tech Stack: Flutter, TensorFlow, BART, Google Speech-to-Text, Transformers

Jewellery Sales Dashboard

An interactive dashboard for analyzing jewelry sales data with visual insights and category-wise breakdowns.

- **Data Upload & Summary View:** Upload CSVs and view key sales metrics like revenue, quantity sold, and top products.
- **Interactive Charts:** Visualize trends using line, pie, bar, and radar charts for better decision-making.
- Integrated an **AI-powered chatbot** to answer user queries about sales, patterns, trends, and product performance.

Tech Stack: React.js, Node.js, Express.js, MongoDB

Fraud Detection Website

MERN app for real-time transaction fraud detection.

- **Transaction Input:** Accepts fields like type, amount, sender, receiver, balances, etc.
- **ML-Based Detection:** Utilizes a trained model to identify fraudulent patterns in real time.
- **Instant Feedback:** Clearly flags transactions as legitimate or suspicious with prediction results.

Tech Stack: React, Node.js, Express.js, MongoDB, Machine Learning

Education

- | | |
|---|-------------|
| • Master of Computer Applications (MCA)
Sardar Patel Institute of Technology, Mumbai University
CGPA: 8.4 / 10 | 2024 – 2026 |
| • Bachelor of Computer Applications (BCA)
Tilak Maharashtra Vidyapeeth, Pune
CGPA: 7.7 / 10 | 2021 – 2024 |

Skills

- **Programming Languages:** Python, C++ , Java, SQL
- **Technologies:** Node.js, React.js, Linux, Machine Learning, Deep Learning, Data Analysis
- **Tools:** Microsoft Office, MySQL, Figma, Canva, Prompt Engineering, ChatGPT, Claude
- **Databases:** MySQL, Oracle, MongoDB

Certifications

- **Introduction to Data Science** – Completed an online course to learn about data science.
[\[Link\]](#)
- **Full Stack Development Course** – Completed an online course to learn about about MERN stack.

Achievements

- Secured Mumbai Rank **31** and AIR **184** in MAH MCA CET 2024.
- **Hackathon Leader:** Led a team of 4 in a national-level hackathon to **build** a solution under 24 hours. [\[Link\]](#)
- **College Event Leadership:** **Organized, coordinated, and managed** multiple student teams for projects and hackathons.

- **Batch Representative (BR):** Represented my batch across semesters; **cooperated** with faculty and **communicated** important info to students.
- **Team Lead – TYBCA Cricket Team:** **Captained** the team and **guided** the squad to a runner-up finish in the college tournament.
