PROJECTS

FocusFlow – Gamified Productivity Web App | MERN Stack ([GitHub Repo](#))

- Built a full-stack gamified productivity app with React, Node.js, and MongoDB, implementing a system of XP rewards and level progression to boost user motivation and task completion rates.
- Implemented real-time frontend features, including a live Pomodoro timer, distraction logging, and optimistic UI updates for a responsive and engaging user interface.
- Ensured backend reliability through comprehensive Jest testing for API endpoints, authentication, and database operations.

Gistify – AI Summarization Chrome Extension | React, Node.js, Gemini API ([GitHub Repo](#))

- Developed an AI summarization Chrome extension using React, Node.js, and the Gemini API to provide instant web content summaries and save users significant time.
- Engineered a robust YouTube transcript extraction module using DOM scraping, with built-in fallback strategies for reliable data retrieval.
- Built a secure backend API featuring rate limiting and environment-based configuration for efficient handling of summarization requests.

Nifty 50 Directional Forecasting with Deep Learning | TensorFlow, Scikit-Learn, Pandas ([GitHub Repo](#))

- Built a hybrid LSTM-CNN model in TensorFlow for stock forecasting, achieving a 0.643 AUC using a market-regime-aware backtesting framework.
- Engineered a feature pipeline generating 40+ technical indicators and implemented a consensus-based feature selection model (RF, LASSO, RFE).
- Improved model reliability using Focal Loss to manage class imbalance and probability calibration for more accurate confidence scores.
