

AISHWARYA KADAM

Pune, Maharashtra | +91-8623964956 | [Email](#) | [LinkedIn](#)

Education

Bharatiya Vidya Bhavan's Sardar Patel Institute of Technology

Masters in Computer Application (MCA)

Mumbai, India

Aug. 2024 – Present

Savitribai Phule Pune University

Bachelor of Computer Applications (BCA)

Pune, Maharashtra

June 2021 – May 2024

Skills

Languages: C++ | Core Java

Web Development: HTML | CSS | JavaScript

Tools: Github | PowerBI | Tableau | Postman

Databases: MySQL | MongoDB

Others: OOP | REST APIs | MVC Architecture | SDLC

Projects

OptiChain: Supply Chain Management Dashboard | Python, SQL, Power BI

[View on GitHub](#)

- Developed an end-to-end pipeline using Python (ETL, data cleaning, anomaly handling) and SQL queries to standardize 1,200+ supply chain records for analysis.
- Built interactive Power BI dashboards to monitor KPIs (fulfillment rate, lost revenue \$7.3M, warehouse utilization 34%).
- Identified risks: Supplier D & B caused \$4M+ lost revenue, Furniture & Clothing contributed 60% of losses; recommended SLA renegotiation, safety stock increase, and supplier diversification.
- Simulated process improvements (2-day lead time reduction) → boosted fulfillment from 70% to 75%, providing actionable insights for supply chain optimization.

FundFlow-Analytics: Bank Loan Dashboard | SQL, Power BI

[View on GitHub](#)

- Developed SQL queries to aggregate and analyze 35,000+ bank loan records, deriving KPIs such as total applications, funded amount, repayment amount, average interest rate, and borrower DTI.
- Built interactive Power BI dashboards to track portfolio KPIs (monthly loan trends, state-wise loan distribution, borrower profiles by purpose, grade, term, employment length, and home ownership).
- Delivered insights into portfolio health by categorizing loans into good vs. bad, highlighting repayment performance, default risks, and customer behavior patterns.

Lost AND Found Tracker | Java Servlets, JSP, JDBC, MySQL

[View on GitHub](#)

- Built a Lost and Found web portal enabling users to report and search lost items, and implemented secure role-based authentication with admin controls for post approval and user management using Java Servlets and session handling.
- Developed advanced search and filtering features, enabling users to quickly discover items by category, date, and location.
- Built a real-time admin dashboard with data analytics and PDF report generation using iText, enabling efficient decision-making and documentation.

Certificates

Introduction To Supply Chain Management - Course Publisher NPTEL - Alison

Mastering Python, Pandas, Numpy for Absolute Beginners - Udemy

Strategic Sales Management - NPTEL

Extracurricular Activities

- Participated in the Earn and Learn scheme during UG, worked across departments **Research, NCC, IQAC, and DMS**.
- Volunteered as a scribe for blind students during graduation exams.
- Assisted in event coordination and ensured a smooth experience for participants at Mumbai Cubing Sprint 2024.
- Participated in the Women's Frontend Hackathon 2025 at S.P.I.T, organized by WIE IEEE.
