About

A diligent MCA student with strong problem-solving and communication skills, seeking opportunities to apply knowledge in software development and data science. Experienced in collaborative environment and applied machine learning.

Education

Bharatiya Vidya Bhavans Sardar Patel Institute of Technology <i>Master of Computer Applications</i>	Mumbai <i>September 2026 (Ongoing)</i>
Hemvati Nandan Bahuguna Garhwal University <i>Bachelor of Science – Computer Science</i>	Srinagar <i>May 2024</i>

Projects

- **Job Scraper & Tracking System — FastAPI, SQLAlchemy, Playwright, SQLite, Python**
 - Built a RESTful API using FastAPI and SQLAlchemy that scrapes job listings from multiple sources.
 - Implemented async web scraping system using Playwright with concurrent processing, error handling, and rate limiting.
 - Designed normalized database schema with SQLite and created modular architecture with job tracking.
- **Group Chat Desktop App (Hackathon) – Real-time multi-user chat application built using Java Sockets, multithreading and Swing.**
 - Implemented server-client architecture supporting concurrent messaging with thread-safe broadcasting across 10+ users.
 - Designed a responsive desktop interface using Java Swing with user authentication and message timestamps.
 - Deployed in a hackathon setting; demonstrated team collaboration, rapid prototyping, and real-time debugging under pressure.
- **Earthquake Damage Detection Using Multi-Sensor Satellite and SAR Imagery (Ongoing)**
 - Developing a Python-based system to detect earthquake-damaged buildings using satellite and SAR imagery.
 - Leveraging GDAL, QGIS, and Rasterio to align and preprocess GeoTIFF images from Maxar, Sentinel, Capella Space.
 - Targeting >80% classification accuracy to support rapid post-disaster response.

Certifications

- **Applied Data Science and Machine Learning – E&ICT IIT Roorkee**
 - Completed applied ML program covering Python, statistics, visualization, supervised/unsupervised learning, model evaluation.
 - Hands-on projects using NumPy, Pandas, Scikit-learn, real-world datasets.
- **Python Bootcamp – Udemy**
 - Covered core Python, OOP, file handling, web scraping.
 - Built mini projects like text games and automation tools.
- **MySQL Fundamentals – Coursera**
 - Learned SQL queries, joins, subqueries, normalization, and relational database basics.

Technical Skills

- **Languages:** Python, SQL, C++(Beginner), Javascript(Beginner), Java(Beginner)
- **Tools:** Pandas, Scikit-learn, Numpy, Matplotlib, MySQL
- **Concepts:** Machine Learning, OOPs, Data Visualization

Position of Responsibility

- **Training & Placement Coordinator – SPIT (Oct 2024–Present)**
 - Acted as liaison between students and recruiters, ensuring effective communication and coordination.
 - Organized and managed campus placement drives, from employer outreach to interview scheduling.

Accomplishments

- **MAH MCA CET - 99.78 percentile**
- **House Captain & Best Sports Person – Montfort School (2019–20)**
