Experience

Quality Assurance (AT & MT) *Tata Consultancy Services*

India July 2021 - Present

- Worked closely with the software development team to ensure defect-free applications.
- Actively participated in all phases of product testing and planning.
- Wrote extensive bug reports.
- Handled important calls on behalf of the team.

Projects

1. **Blank Out - Automated Blank Page Detection System** (*Team Project*)

- Developed an automated system to enhance efficiency in educational institutions by detecting and removing blank pages from scanned student answer sheets, streamlining the evaluation process.
- **Technologies Used:** Python, TensorFlow, MobileNetV2, OpenCV, PyMuPDF, Pandas.
- **Key Collective Team Achievements:**
 - Engineered a machine learning model using TensorFlow and MobileNetV2 for accurate classification of PDF pages as blank or non-blank via image processing.
 - Utilized Python with PyMuPDF and OpenCV to process batches of PDF files, extracting non-blank pages and preserving the first page of each document for reference.
 - Implemented a unique 10-character identifier system to tag output PDFs, ensuring traceability and efficient file organization.
 - Automated the generation of detailed Excel reports using Pandas, capturing input/output file names, execution times, and file locations for comprehensive record-keeping.
- **Impact:** Significantly reduced manual effort in evaluating scanned answer sheets by enabling batch processing of PDFs and improving workflow efficiency for educators.

2. **Cuisine Cultura – “City’s finest on a plate”**

- Developed a comprehensive Android application using Java to deliver a seamless user experience, enabling users to explore top dining options in the city, ranging from street food vendors to Michelin-starred restaurants, with detailed descriptions, recommended food, and locations.
- **Technologies Used:** Android Studio, Java, SQLite.
- **Features:**
 - User registration and authentication system.
 - Location-based filtering to browse food joints by city or area.
 - Categorized listings of dining establishments with detailed descriptions, recommended dishes, high-quality photos, and precise location mapping.
 - Interactive user interface for posting comments, reviews, and ratings to enhance community engagement.

Education

Masters of Computer Application *Sardar Patel Institute of Technology* *September 2024 – Present*

- Class Representative of the Batch 2024-26.
- Enactus Committee – Head of Events.
- Current CGPA: 9.02

Python and Data Science Technology *Dcodetech Industrial Training, Thane* *August 2021 – June 2022*

- Completed a one-month internship at Deznolitics.

Bachelor in Computer Science *University of Mumbai, C.H.M. College Ulhas-nagar* *August 2021 – June 2022*

- CGPI: 9.43/10

Skills

Programming Languages: Python, Java, C++, R

Technologies:

- **Selenium:** Maintained and enhanced Selenium-based test automation scripts for web applications, ensuring robust and reliable UI functionality.
- **Salesforce:** Conducted manual testing and UI-level automation testing for Salesforce web applications, ensuring high-quality user interfaces.

Databases: MySQL, SQLite

Other: Data Science with Python, Web Scraping, Data Analysis with Python

Achievements

- Python for Everybody Specialization with honors completed through [Coursera](#) .
- Indian Servers, Core Python Certification Program [Certificate](#) .
- ISTQB Foundation Level [Certificate](#) .
- Dcodetech Industrial Training Certificate and Certificate of Internship at [Deznolitics](#) .
