PROJECTS

Sentiment Analysis on Social Media

Jan 2025 - Present

This project performs Sentiment Analysis on Social Media by combining CNN for analyzing images and BERT for understanding captions. CNN extracts visual features, while BERT interprets textual context. Together, they classify posts into sentiments like positive, negative, or neutral, providing deeper insights into user emotions from multimodal social media content.

Movie Recommendation System with Search

Oct 2024 - Nov 2024

This project creates a Movie Recommendation System with Search using pandas for efficient data handling. Users can search movies by title, and the system recommends similar movies based on ratings, genres, or popularity. It leverages pandas for filtering, sorting, and similarity, helping users quickly find movies matching their interests.

Plagiarism Detector

June 2024 - July 2024

This project implements a Plagiarism Detector in C++ using file handling and hashing. It reads multiple documents, tokenizes their content, and generates hash values for comparison. By checking matching hashes, the system efficiently detects similarities and calculates plagiarism percentages, ensuring faster and more accurate content originality verification.

POSITIONS OF RESPONSIBILITY

Placement Co-ordinator

Training and Placement Office

As a Placement Coordinator, I assisted the Training and Placement Cell by coordinating between students and recruiters, managing pre-placement activities, scheduling interviews, and ensuring smooth communication. I guided peers in resume preparation, maintained placement records, and facilitated company requirements, contributing to the overall success of recruitment drives.

Subcommittee Member

ACSES Committee

As a Subcommittee Member, I supported event planning and execution, coordinated with team members, and assisted in logistics and communication. I contributed ideas, managed assigned tasks responsibly, and ensured smooth functioning of committee activities, helping achieve the objectives of the college committee effectively.

EDUCATION

Masters of Computer Applications

June 2026

Sardar Patel Institute of Technology, Mumbai

Bachelors of Science in Information Technology

Sept 2023

St. Xavier's College, Ranchi (CGPA: 6.22)

SKILLS

Languages Python, C++, JavaScript

Concepts Machine Learning, Neural Networks, Linear Regression

Databases SQL, MySQL

Technologies Pandas, Tensorflow, PyTorch
