OBJECTIVE

Java backend developer skilled in Spring Boot and REST APIs, with experience building scalable and robust applications. Strong focus on writing clean, maintainable code and leveraging modern tools and best practices to deliver reliable software solutions. Seeking to contribute to impactful projects in a collaborative engineering environment.

EDUCATION

Sardar Patel Institute of Technology, Mumbai

Master of Computer Applications

Expected June 2026

CGPA: 8.23/10

B.Y.K College of Commerce, Nashik

BBA in Computer Applications

2021 – 2024

CGPA: 7.58/10

PROJECTS

IntervuLog | *Spring Boot, TailwindCSS, Thymeleaf, PostgreSQL, Supabase, Render*

[Link](#)

- Built a full-stack platform used by **240+ students** to share and explore verified interview experiences.
- Applied Spring Security **RBAC** and gating, preventing **100% unauthorized access** and spam entries.
- Enhanced search with 10+ JPA specifications, achieving **3x faster queries** and improved user efficiency.
- Automated deployments on Render with GitHub CI/CD, ensuring zero downtime and version control.

INDStocks | *PyPI Package, Python, BeautifulSoup, Requests*

[Link](#)

- Released **open-source Python package** to explore Indian stock market data for developers and traders.
- Achieved **149 downloads** on launch day, grew to **1,100+ installs** with 10+ daily downloads on PyPI.
- Unified scraped data from 3 trusted financial sources to provide **real-time** and historical data to users.
- Delivered live prices, news, and financials for **top 500 firms**, covering 1,500+ stock market scripts.

Chess Game | *Java, Swing, AWT*

[Link](#)

- Built a GUI-based chess game in Java with Swing and AWT, supporting full player-vs-computer gameplay.
- Designed modular OOP architecture separating game logic, UI rendering, and move validation layers.
- Implemented rule-aware engine handling legal moves, check, checkmate, and turn-based enforcement.
- Added opponent using Minimax with alpha-beta pruning to enable efficient strategic decision-making.

EchoStream | *Spring Boot, Socket Programming, TailwindCSS* (Ongoing)

[Link](#)

- Built a reactive backend using Spring WebFlux and WebSockets to deliver real-time messaging features.
- Created typing indicators using Flux sinks to provide real-time feedback for users during chat.
- Added simple error handling and basic backpressure logic to keep the system stable under load.
- Developed frontend with infinite scroll and lazy-loaded messages to improve overall user experience.

TECHNICAL SKILLS

Programming Languages: Java, SQL, JavaScript, Python(basics)

Frameworks: Spring Boot, Spring MVC, Spring Security, REST APIs, HTML, TailwindCSS

Databases: PostgreSQL, MySQL

Tools & Platforms: Git, GitHub, Postman, Render, Supabase

TECHNICAL CONTRIBUTIONS

IntervuLog: Secured TPO approval for IntervuLog rollout, expanding adoption and student interview inputs.

Spring Tutorial: Created a Spring WebFlux tutorial actively used by 60+ students learning via Moodle.

CERTIFICATIONS AND ACHIEVEMENTS

Spring Boot 3, Spring 6 & Hibernate for Beginners — *Udemy*

[Link](#)

- Completed course on Spring Boot, REST APIs, Spring MVC, Spring Security, Hibernate, and JPA.

Introduction to Java Backend Development — *Scaler Academy*

[Link](#)

- Finished Scaler Academy course covering Java backend, Spring Boot, databases, and deployments.

MAH MCA CET 2024

- Achieved 99.47 percentile in MAH MCA CET , ranking among the top 0.5% candidates nationwide.
