

Tejas Orke

Wardha, Maharashtra otejas40@gmail.com +91 9370439428 GitHub: [TejasOrke \(Tejasorke\)](#)

An aspiring software developer with strong skills in Java, SQL, and Spring Boot. Passionate about backend development and database management, with hands-on experience in building robust web applications. Continuously learning new technologies and always ready to tackle challenging problems with a solution-oriented mindset.

EDUCATION

Sardar Patel Institute of Technology
MCA Computer Applications CGP: 8.11

Mumbai
Sep 2024 – June 2026

Vidyabharti College Seloo
Bachelor of Science (B.Sc) in Computer Science : 74%

Wardha
2019 -2022

SKILLS

Backend: Spring Boot, Spring

Databases: MySQL, MongoDB, PostgreSQL

Programming Languages: Java, Python, JavaScript, C++

Frontend: React.js, HTML CSS

DevOps & Testing Tools: Jenkins, Docker, Ansible, Kubernetes

Version Control: Git, GitHub

PROJECTS

Hospital Management System (HMS) – Microservices Architecture [[View on GitHub](#)]

- Built a full-stack HMS using React.js and Spring Boot microservices with JWT-based authentication.
- Developed modular services: Authentication, Patient, Doctor, Appointment, Billing, and Profile, registered with Eureka and routed via an API Gateway
- Integrated MySQL databases per service with secure CRUD operations and role-based access using Spring Security.
- Designed a clean, responsive UI using React Router, Axios, and Tailwind CSS; documented backend using Swagger.

Graph Path Visualizer Spring Boot, React [[View on GitHub](#)]

- Built a full-stack graph visualization tool to compute and display shortest paths interactively.
- Implemented key algorithms: Dijkstra, Bellman-Ford, and Floyd-Warshall for real-time pathfinding.
- Backend developed with Spring Boot, frontend with React.js for responsive graph rendering.

Document Management System [[View on GitHub](#)]

- Developed a MERN stack application with NLP integration to extract, process, and display student documents like LORs and internship records.
- Enabled automated data extraction from PDFs, Excel files, and images, improving efficiency and reducing manual entry.
- Displayed structured data through an intuitive, searchable interface for admins and faculty.
