SUMMARY

Master's student with proven expertise in building end-to-end data solutions, from engineering pipelines with Python and SQL to deploying predictive models and insightful visualizations. Eager to apply these quantitative skills to solve complex data, risk, and control challenges.

EDUCATION

Master of Computer Applications (MCA)	CGPA:8.87	Aug 2024 - Present
Sardar Patel Institute of Technology, Mumbai, IN		
Bachelor of Science in Information Technology (BSc IT)	CGPA:9.75	May 2021 - May 2024
Dnyandeep College of Science And Commerce, Ratnagiri, IN		

SKILLS

- **Quantitative & Data Analysis:** Python (Pandas, NumPy, Scikit-learn), SQL, Statistical Modeling
- **Machine Learning & AI:** XGBoost, SHAP (Explainable AI), Data Analysis
- **Backend & APIs:** Node.js, Java (Servlets), SQLAlchemy, Firebase, REST APIs
- **Databases:** PostgreSQL, MySQL
- **Frontend & Visualization:** React, Streamlit, HTML5, CSS, JavaScript, Tailwind CSS
- **Mobile Development:** Flutter, Dart, Android Studio
- **Developer Tools & Platforms:** Git, GitHub, VS Code, Postman, Streamlit Community Cloud

PROJECTS

<u>Explainable AI Financial Advisor (Python, XGBoost, SHAP, Streamlit, PostgreSQL)</u>	Present
• Developed a quantitative risk-profiling model using XGBoost and Python (Scikit-learn, Pandas) to deliver personalized financial advice based on user data. • Engineered a data pipeline using SQLAlchemy to process and feed data into the model, deploying the full-stack analytical tool on Streamlit Community Cloud. • Implemented Explainable AI (XAI) with SHAP to ensure model transparency and interpretability, a key requirement for financial governance and control. • Designed an interactive dashboard using Streamlit (analogous to Power BI) for data visualization, allowing users to understand complex model outputs intuitively.	
InSighted Secure Data & Transaction Hub (MERN Stack)	April 2025-May 2025
• Engineered a secure transaction platform using React with role-based access controls (RBAC) for real-time monitoring and reporting of sensitive data.	
<u>Online Sneakers shopping website (Flutter & Dart, Firebase)</u>	April 2025-May 2025
• A Flutter-based mobile application to browse and manage sneaker collections. • The project is utilizing Firebase for backend integration and modern Material Design principles.	

LEADERSHIP & KEY ACHIEVEMENTS

Creative Subcommittee Member ACES Sardar Patel Institute of Technology	Present
• Coordinate with a team to design and promote institute-level technical events, developing promotional materials and student engagement strategies.	
Member, Yuva Forum	2020 - Present
• Led and coordinated community welfare projects, including city-wide cleanliness drives, blood donation camps, and animal rescue operations (200+ animals saved).
