Experience

IT Intern (Remote)

TCS iON, Thane, India

Nov 2023 – Feb 2024

- Worked remotely on an NLP-based project titled “Emotion Detection from Passages”, aiming to classify emotions (e.g., joy, anger, sadness) in unstructured text.
- Utilized Natural Language Processing techniques and trained models using TF-IDF and word embeddings for feature extraction. Explored and applied supervised learning algorithms (Logistic Regression, SVM) for emotion classification.

Projects

Explainable AI Financial Advisor

Developed a financial advisory platform for Indian investors using ML models like Random Forest and XGBoost to predict investment suitability. Integrated SHAP for explainable AI, enabling transparent and interpretable recommendations. Used Indian financial data schemas (income, goals, investments) and designed system architecture for future Reinforcement Learning integration. Built a user-centric interface using Streamlit with focus on compliance and bridging financial literacy gaps.

IoT Intrusion Detection System

Built an ML-based system to detect anomalies in IoT network traffic using real-world datasets. Applied preprocessing on 86 features, removed redundant and unique identifiers, and used feature selection with Random Forest. Trained classifiers like Decision Tree, Random Forest, Gradient Boosting, and XGBoost. Achieved highest accuracy of 89.9% with XGBoost after feature selection and SMOTE balancing. Visualized class-wise performance and evaluated precision, recall, and F1-score.

Blog Website with Role-Based Access

Developed a blog platform using HTML, CSS, JavaScript, and SQL for backend storage. Implemented role-based access with three roles:

- User** – Register, log in, and publish blog posts.
- Admin** – Review, approve, or delete posts; manage users.
- Reviewer** – Flag/report unethical or inappropriate content.

Education

Master of Computer Applications (MCA)

Bhartiya Vidya Bhavan Sardar Patel College, Andheri West

Expected Jun 2026 — CGPA: 7.83

Bachelor of Computer Applications – Data Science

Chhatrapati Shivaji Maharaj University, Navi Mumbai

Jun 2024 — CGPA: 8.81

Technical Skills

Programming Languages: Python, Java

Core Skills: Machine Learning, Data Structures and Algorithms, System Design Fundamentals

Frameworks / Platforms: React, Flutter, Arduino, Git, GitHub, VS Code, Firebase

Professional Skills: Problem-Solving, Analytical Thinking, Communication, Team Collaboration

Certifications

- Cloud Computing – Basics of deployment and virtualization
- Information Security – Principles of system protection
- Data Mining – Data preprocessing, pattern extraction
- Full Stack Web Development – HTML, CSS, Node.js, MongoDB, React

Accomplishments

- Represented school and zone in Athletics, Basketball, and Martial Arts – demonstrating discipline, teamwork, and leadership.
- Served as Event Head of the Women in Engineering (WIEEE) Committee – coordinated technical and outreach events promoting gender inclusion in STEM.
