

PROFILE

Full-stack developer with practical experience building responsive web applications using Node.js and React.js. Database proficiency includes PostgreSQL and MongoDB for diverse data management needs. Hands-on experience with containerization using Docker and Kubernetes through academic and personal projects. Recent graduate seeking software development role to leverage technical foundation and grow expertise through mentorship and collaborative development.

EXPERIENCE

COMPUTECH LLP

Mumbai, India

- Diagnosed and resolved over 50 hardware/software issues, reducing turnaround time by 20%.
- Utilized tools like MemTest86, CrystalDiskInfo, nvidia-smi, and OCCT for performance testing and diagnostics.
- Streamlined OS installation and repair workflows to improve service efficiency.

HARDWARE ENGINEER - INTERN

Apr 2024 – Oct 2024

R.S. WAREHOUSE

Mumbai, India

- Built a responsive portfolio website using React (Vite) and Tailwind CSS to showcase services and establish the client's online presence.
- Developed a custom enquiry form with Nodemailer to route client queries directly to the business inbox.
- Delivered an SEO-friendly frontend with a lightweight Node.js backend for efficient form handling.

WEB DEVELOPER - FREELANCE

Jan 2024

HOLIDAYS TOURS & TRAVELS

Mumbai, India

- Spearheaded development of a full-stack CRM to streamline client trip management, including destination tracking, travel companions, tour codes, and gifting logs.
- Engineered a robust invoice module supporting full, partial, and EMI payments with admin approval workflows and print-optimized layouts.
- Integrated a one-click mailing system to instantly deliver invoices to clients, enhancing operational efficiency.
- Automated generation of Excel-based trip reports to simplify tracking across years, destinations, and service providers.

SOFTWARE ENGINEER INTERN (WEB) - INTERN

May 2025 – Jul 2025

PROJECTS

Property Listing System – Real Estate API Platform

Personal Project (Jul 2025)

Technologies: Node.js, Express.js, MongoDB, Redis, JWT

- Developed a scalable REST API for real estate listings with JWT-based authentication and role-based access control.
- Implemented property CRUD, advanced filtering, favorites, and a recommendation system between users.
- Boosted performance using Redis Cloud for caching and MongoDB Atlas for flexible data storage.

DraftWise – AI-Powered Email Generator

Personal Project (Jun 2025)

Technologies: React.js, Vite, Tailwind CSS, Node.js, OpenAI API, GSAP, Google OAuth

- Built a full-stack GenAI application for generating personalized, tone-aware emails using Gemini language models.
- Integrated secure Google OAuth for user login and session handling.
- Supported tone customization and copy-to-clipboard functionality.
- Ensured robust UX with error handling, loading states, and seamless email drafting flow.

InkSync – Real-Time Collaborative Editor

Personal Project (Dec 2024)

Technologies: Node.js, Socket.io, React.js, MongoDB

- Enabled live text editing by multiple users via WebSocket protocol.
- Designed REST APIs for session management and data persistence.
- Structured the codebase for readability and easy maintenance while implementing real-time features.

EDUCATION

MCA, SARDAR PATEL INSTITUTE OF TECHNOLOGY

Mumbai, India

Expected 2026

BSC IT, JOHN WILSON COLLEGE

Mumbai, India

8.3 CGPA

COMPETITIONS & HACKATHONS

Runner-Up, TIMSR College Hackathon (Feb 2025)

- Developed a pseudonymous complaint registration system under time constraints.
- Designed system architecture and led frontend development using Vite.js and Material UI.

2nd Place – Tech Quiz Competition, Hiray College

- Secured podium in a competitive technical quiz by showcasing analytical and logical reasoning.
- Reinforced deep understanding of networking, OS, and programming fundamentals.

TECHNICAL SKILLS

- Languages: C++, JavaScript (ES6+), SQL, HTML
- Frameworks & Libraries: , CSS, React, Node.js, Express, Mongoose, Socket.io
- Databases: MySQL, PostgreSQL, MongoDB
- Tools & Platforms: Git, GitHub, Docker, Jenkins, Linux CLI, XAMPP, Postman
- APIs & Services: Google OAuth, SMTP, REST APIs
- Cloud Technologies: Azure, AWS, Vercel ,Render
