## SUMMARY

Detail-oriented Master's student specializing in DevOps and automation. Experienced in building robust CI/CD and data pipelines using AWS, Docker, and GitHub Actions. A Top 10 CTF finisher with a passion for improving software delivery and reliability through automated solutions.

## EDUCATION

|                                                      |                |
|------------------------------------------------------|----------------|
| <b>Master of Computer Applications</b>               | 2024 - Present |
| University of Mumbai, S.P.I.T - CGPA - 9.51          |                |
| <b>Bachelor of Science (Computer Science)</b>        | 2021 - 2024    |
| University of Mumbai, Mithibai College - CGPA - 7.77 |                |
| <b>High School - XII (Science)</b>                   | 2019 - 2021    |
| Vartak College , Vasai (90.67%)                      |                |

## TECHNICAL SKILLS

**Programming Languages:** Python (Pandas, NumPy), SQL, C++, Java, JavaScript

**Frameworks & Libraries:** Flutter, React

**Databases & Cloud:** MySQL, MongoDB, AWS

**Developer Tools:** Git, Docker, GitHub Actions

## PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |      |
